

Media, Data and Society BA (Hons)

COURSE DETAILS

• A level requirements: <u>ABB</u>

• UCAS code: P3L9

• Study mode: Full-time

• Length: 3

KEY DATES

Apply by: <u>31 January 2024</u>

• Starts: 23 September 2024

Course overview

The BA Media, Data and Society is a forward-looking programme that combines standard approaches to studying the media with computational and data-driven methods to address the growing role of data and algorithms in society.

This is a new programme and is subject to formal university approval.

INTRODUCTION

The programme includes a range of core and optional modules spanning topics such as political media, screen media and public relations. In the second and final years, the modules will provide you with more specialist skills, including a critical understanding of digital media, data, and artificial intelligence, and hands-on technical experience in computer programming, data science, and data visualisation. There is also the opportunity to undertake a Year in Industry as part of the degree, as well as other forms of industrial placement and international study.

Year in industry

This programme is available with an optional <u>year in industry</u>. If you choose this option, year three is spent on a paid placement within an organisation in industry, broadly defined. You will be supported by the School of the Arts and the Department throughout, and your reflexive written account of the experience will contribute towards your final degree result. If you wish to study this programme with a year in industry, please put the option code 'YI' in the 'further choices' section of your UCAS application form.

WHAT YOU'LL LEARN

- Detailed knowledge and understanding in relation to one or more particular areas of the field of study
- Transferable skills in critical, numerical, computational and digital methods, as well as in problem solving
- Detailed knowledge of media forms and practices
- A range of critical, analytic and technical skills
- Detailed understanding of different theoretical frames of reference
- Familiarity with contemporary debates around the use of digital data in society
- The ability to construct arguments and convey ideas effectively
- Effective communication and presentation skills

Course content

Discover what you'll learn, what you'll study, and how you'll be taught and assessed.

YEAR ONE

Your first year consists entirely of compulsory modules, through which you will establish the foundation for the rest of your studies.

You will take 120 credits of modules in each year. If taking the year in industry option, your third year of study will be spent on placement.

COMPULSORY MODULES

COMMUNICATION, CULTURE, AND MEDIA ANALYSIS A (COMMIII)

Credits: 30 / Semester: semester 2

This module will give students foundational knowledge about ways that communication, media, and culture can be systematically and critically analysed: students will learn about key concepts and theories from the field of media and communication studies and about how these are applied as tools for analysis. The module offers examples of the craft of screen analysis, cultural analysis, and social scientific communication studies. These will be analytical approaches that students can subsequently use in the course of their studies.

DIGITAL COMMUNICATION AND SOCIAL MEDIA (COMM113)

Credits: 30 / Semester: semester 2

This module will provide a broad introduction to digital communication and social media as an object of study. It will facilitate students in thinking about the role of the internet, digital platforms and social media apps and their role in culture, society and democracy. It will firstly ask what is different about digital and social media compared to more traditional media, and pose the question of whether we need new tools and ways of thinking in relation to these newer media. It will then introduce several topics and case studies to allow students to think about the role and potential influence the rise of these tools may or may not have had on society.

INTRODUCTION TO COMMUNICATION AND MEDIA STUDIES A (COMM101)

Credits: 30 / Semester: semester 1

This module will introduce students to foundational knowledge in the field of communication and media studies. Students will learn how communication practices and media technologies have developed historically and their relevance for social, political and economic changes, as well as learning about the development of Communication and Media as a broad and diverse academic field. The module familiarises students with different theoretical perspectives both historical and contemporary.

MEDIA INDUSTRIES AND INSTITUTIONS A (COMM109)

Credits: 30 / Semester: semester 1

This is an introduction to issues and concepts surrounding media and communication industries and institutions. The module gives students exposure to core and current debates and issues such as the political economy of media, relations with power and regulation, and processes of globalisation, digitalisation and conglomeration. Students will learn about creative roles and the practices and lived experiences of professional media workers, including the process of conceiving and developing media texts. Successful students will be able to critically consider media and communication studies with an emphasis on its industries and institutions.

Programme details and modules listed are illustrative only and subject to change.

YEAR TWO

You will take three compulsory modules, and choose four options.

SOTA260 is compulsory for students taking the Year in Industry pathway.

COMPULSORY MODULES

COMMUNICATION AND MEDIA RESEARCH I (COMM207)

Credits: 15 / Semester: semester 1

This module will enhance students' understanding of academic research in the field of communication and media studies. It is the first of a series of two modules that will equip students with the skills and techniques needed to analyse, execute, interpret, and present academic research. The module will also prepare them for advanced academic projects such as their final-year projects/academic dissertations. This module will introduce students to the basics of academic research – from the key elements in a research study to the difference between primary and secondary, and quantitative and qualitative research. Students will be taught how to write literature reviews and what ethical considerations to bear in mind when designing a research study.

COMMUNICATION AND MEDIA RESEARCH II (COMM208)

Credits: 15 / Semester: semester 2

This module will enhance students' understanding of academic research in the field of communication and media studies. It is the second of a series of two modules that will equip students with the skills and techniques needed to analyse, execute, interpret, and present academic research. The module will also prepare them for advanced academic projects such as their final-year projects/academic dissertations. This module will introduce students to specific quantitative and qualitative research methods for the study of media texts, audiences and producers, continuing on from the semester 1 Research Methods module. These will include textual analysis, content analysis, thematic analysis, discourse analysis; surveys, interviews, focus groups, ethnography; as well as archival research and digital research. Students will also be taught how to formulate research questions, what makes a good student dissertation/final year project and how to communicate their research. They will then be required to prepare research proposals for their final year projects/dissertations.

DIGITAL MEDIA AND DATA A (COMM225)

Credits: 30 / Semester: semester 1

This module will be of particular interest to students interested in data and how it is collected and used in modern society; in the politics and policy questions around social media; and in the interactions between media, platforms and citizens. It will introduce students to the study of online media and platforms, with a particular focus on 'big' social trace data. As well as developing their understanding of how Internet-based media systems work, students will engage with key online political communication policy questions.

OPTIONAL MODULES

IMMERSIVE MEDIA AND VIRTUAL WORLDS B (COMM211)

Credits: 15 / Semester: semester 2

The second-year module Immersive Media and Virtual Worlds explores the histories, theories, and industries related to the production of immersive experiences, digital technologies and virtual realities and worlds. In particular, the module will focus on video games and cinema.

PROFESSIONAL AND CAREER DEVELOPMENT (SOTA260)

Credits: 15 / Semester: semester 1

The module aims to prepare students for a smooth transition into a work placement year and, more broadly, to develop lifelong skills, attitudes and behaviours and support students in their continuing professional development. This will help students lead flexible, fulfilling careers working as a professional in their field, and enable them to contribute meaningfully to society.

SOUND, TECHNOLOGY, AND SOCIETY (MUSI241)

Credits: 15 / Semester: semester 2

This course examines the ongoing relationship between technological development, popular music and the cultures which surround it. Students are introduced to major perspectives on popular music and technology in order to examine social, aesthetic and historical issues.

INTRODUCTION TO PROGRAMMING (COMM226)

Credits: 15 / Semester: semester 2

This module introduces the core principles and techniques of computer programming. The emphasis of the module is to develop technical skills in coding, including the use of variables, loops, functions and libraries. Concepts are introduced in a practical and accessible way, and placed within the context of communication and media. The aim of the module is to develop students' abilities in coding so they can understand better the role of algorithms in society, and are ready for further study in data science and visualisation. By the end of the module, students will have a strong grounding in coding and recognise its role in communication, media and data science.

MUSIC IN GAMING (MUSI273)

Credits: 15 / Semester: semester 1

This module examines the function and design of music in video games (including gamesconsoles, PCs, and smart-phone 'apps'). It considers the historical development of music in gaming, the relationship between game-music and technological advance, and the role and function of music in different types of game (and how this dictates compositional choice). This is achieved via a combination of case-study analyses and engagement with appropriate literature and research. Delivery incorporates lectures, workshop/seminars, and directed activity. Assessment incorporates a discursive essay and a portfolio of case-study analyses. The module assumes the study and discussion of case-study examples, but is delivered and assessed in a manner which does not require technical music skills (ie notational literacy or formal analytical method).

FEMINIST MEDIA STUDIES: TEXTS AND AUDIENCES B (COMM206)

Credits: 15 / Semester: semester 2

This module introduces students to feminist media studies: they will become familiar with key concepts and debates relating to gender, with reference to a range of media, as well as thinking about how we conceptualise media audiences. Students will consider the gendered nature of representations as well as various media cultures; the intersection of gender with, for instance, race, class, and sexuality; and sites of/for audience participation, 'prosumption' and the resistance of normative ideals.

CONVERGED MEDIA AND SCREEN ENTERTAINMENT B (COMM251)

Credits: 15 / Semester: semester 1

Converged Media and Screen Entertainment B examines key ideas and arguments in the broader field of media industry studies with a view to provide students with wide-ranging account of how the screen industries produce and distribute commercial entertainment within a converged media environment, while operating as part of organizational arrangements and professional practices that separate them from industries with an information focus. The module accounts for the local, national and global dimension of screen entertainment with case studies and examples taken from a variety of geographical contexts and covers a number of industries, mainly film and television, but also with references to games and social medial.

Organised around 4 blocks – Terms of Reference, The Global Spectre of Entertainment, The Production of Entertainment and Entertainment Labour – the module kicks off with some conceptual issues and definitions around what entertainment is and how the landscape in which it is produced and disseminated is defined by media convergence and – increasingly – deconvergence. With these terms of reference accounted for, the second block surveys some key characteristics related to the global nature of screen entertainment: the issues at stake in regulating its circulation across different geographical, political and cultural environments; the ways in which its production tends to be clustered around particular hubs and networks, the ways in which it contributes to global media flows organised around distribution power and the ways it is also disseminated through informal or piracy networks.

After an independent study week that enables students to catch up with reading and prepare for their first assignment, the module continues with a block on the production of entertainment, with an emphasis there being on some of the textual characteristics of entertainment products as these are influenced by marketing and brand integration, by intellectual property management and the increasing reliance on narrative universes and world-building, and by promotional content designed to move swiftly across media platforms and to attract online interaction. Some of these characteristics distinguish clearly entertainment media from media that revolve around information. Finally, the last block deals with issues relating to working in screen entertainment industries, focusing primarily on issues relating to unions and crafts and the ways they try to control entertainment with an environment where the power of the unions has declined as well on issue of diversity in the screen industries work force.

PUBLIC RELATIONS, MEDIA AND DIGITAL SOCIETY (COMM240)

Credits: 15 / Semester: semester 1

This module will explore theoretical perspectives on Public Relations, including critical perspectives on its role in media and digital society and the professional practice of promotional writing, a key skill within and beyond PR. Students will develop understanding of what it means to be a creative professional in the PR industries by learning to organise their time effectively, to produce work to specific briefs and to ensure attention to detail in the delivery of projects.

INTRODUCTION TO CULTURAL STUDIES B (COMM254)

Credits: 15 / Semester: semester 1

Introduction to Cultural Studies provides a foundational understanding of the key approaches, methods and theoretical perspectives in the interdisciplinary field of cultural studies. The module starts with an historical overview of the development of cultural studies and explores its links with related fields such as anthropology, sociology, and everyday life studies. The module is taught in four blocks. Blocks 2–4 are organised around core thematic areas of focus which provide, respectively, an introduction to perspectives in the study of contemporary visual cultures; an introduction to urban cultural studies and the spatial humanities; and critical reflection on 'future cultures' and the shifting boundaries that define understandings of 'nature' and 'culture' in the age of the posthuman and the Anthropocene. Engaging with theoretical perspectives and debates that address a broad range of contemporary issues in the study of culture, media and everyday life, the module draws extensively on ethnographic, text-based and other qualitative methods, with a particular emphasis towards understandings of culture and media as forms of social, embodied and political practice and the everyday 'doingness' of cultural experience.

AI AND DIGITAL MEDIA (COMM258)

Credits: 15 / Semester: semester 2

In this module, students will learn about Artificial Intelligence algorithms that influence the development of digital media systems and content. Students will critically address key questions around the social, political and economic consequences of online platforms' use of Al systems and how they are or could be regulated.

Programme details and modules listed are illustrative only and subject to change.

FINAL YEAR

- All of our students undertake a project involving their own sustained, research-based work in their final year, whether by taking the Dissertation module, collaborating on staff research, producing brief videos to client or by applying the skills you have learned by taking our Work Placement module.
- You must take one and no more than one of the following: **COMM335**, **COMM342**, **COMM401**, **SOTA300**.

OPTIONAL MODULES

RESEARCHING DIGITAL CULTURES IN THE AMERICAS (HISP348)

Credits: 15 / Semester: semester 1

This module develops research and critical skills when examining digital cultures with a particular focus on the Americas. It takes examples that encompass North, Central, and South America as well as the Caribbean. Building confidence in handling theoretical tools in the analysis of digital cultures it examines a range of professional and amateur content creators from social, institutional and personal perspectives and considers issues of curatorship, archival approaches, the ethics of (re)appropriation and remediation, and the relationship between the self and the public and private spheres.

DISSERTATION (COMM401)

Credits: 30 / Semester: whole session

A dissertation is a self-contained piece of original research. It is your chance to study a topic that interests you in depth, guided by a member of the Department's academic staff who will act as a supervisor for your research. While it is not expected that the dissertation will achieve the standard of a published article, a general idea of the length, format and style of presentation envisaged can be obtained by scanning academic articles in the area that the dissertation will deal with. In terms of presentation, dissertations must be word-processed, double spaced and bound.

FINAL YEAR PROJECT (COMM335)

Credits: 30 / Semester: whole session

This module will provide students with the opportunity to work on a final year project. The nature of the project will be negotiated between the students and their supervisors. It might include: working on live academic research projects or working on live projects in collaboration with academic staff and external partners or working on practical outputs related to a specified (research) task.

GAMES AND ALGORITHMIC CULTURE (COMM309)

Credits: 15 / Semester: semester 1

Games and Algorithmic Culture investigates how videogames are responding and contributing to the current technological and cultural changes in the use of Al, data mining, procedurally generated content, metrics and automation. The module provides a fundamental knowledge of the videogame industry and its new markets and trends, such as eSports, live streaming, independent productions, casual and mobile gaming. It explores how these new social, cultural and aesthetic trends of game culture are framed around a broader algorithmic culture that pervades our contemporary technics of digital production and distribution. The module will enable students to understand the specificity of games as new media, to critically analyse the technical, economic and social factors that frame contemporary digital culture, and identify areas of intervention within the global entertainment industry.

INTRODUCTION TO STRATEGIC COMMUNICATION (COMM312)

Credits: 15 / Semester: semester 2

This module offers students an introduction to study of strategic communication, seen as an interdisciplinary field of research and professional practice. Students will familiarise themselves with key concepts for critical understanding and analysis of how organisations communicate strategically in social contexts. The teaching content combines theories and case studies which relate to strategic communication phenomena in different sectors (e.g. business, politics, non-profit). Assessment is based on an essay and a group project.

ISSUES IN PHOTOGRAPHY (COMM323)

Credits: 15 / Semester: semester 2

Investigating both early and contemporary photography, this module examines the role photography plays in remembering private and public events, particularly those that test the limits of visual representation. It will unpack contemporary debates among photographers, journalists and art historians on topics such as photographing suffering and the relationship between photography, affect and emotions. We will discuss the difference between analogic photography and digital photography; ID pictures and family photos; artistic photography and journalistic photography; and personal and public pictures. Students will also learn to read, discuss and critically write about how the different components of a photograph (such as framing, montage, lighting and materiality) serve as a tool of expression and means to interpret events.

MEDIA AND CAMPAIGNING (COMM302)

Credits: 15 / Semester: semester 1

This module explores the role of the media during electoral and other campaigns. It explores the relationships between media, politics and the democratic process. We will study the evolution of the electoral campaign and changes to the form and content of campaigns might have impacted broader democratic concerns. We consider some of the key concepts and theories which seek to conceptualise the communication and mediatisation of public and political mechanisms. We will assess whether campaigns matter, whether the system put in place to oversee campaigns is fit for purpose, and how well the media report on and scrutinise campaigns.

MEDIA AND HUMAN RIGHTS (COMM317)

Credits: 15 / Semester: semester 1

The module studies human rights through the lens of the media in order to critically understand the changing nature of human rights' representation and the role media play in representing and responding to critical human rights issues. It explores the interconnections between media and human rights focusing on media and human rights theory, policy and practice and exploring both historical developments and contemporary issues. In particular, the implications of the global media in the current information age for a range of key human rights' issues are analysed. Among the issues that will be reviewed are terrorism and war on terror, freedom of speech, human trafficking, asylum and immigration, torture and genocide, humanitarian intervention.

NEWS MEDIA AND SOCIETY (COMM301)

Credits: 15 / Semester: semester 2

This module examines the concept of news and how it is constructed. Students will be introduced to key debates related to the historical development of journalistic norms and ideals such as the rise of objectivity and impartiality. The module also considers key theories which help to explain how news is produced such as 'news values' and 'agenda-setting' and furthermore, the potential implications for audiences as citizens. The module will also consider the future of journalism in a digital age, examining the challenges of producing news in times of declining revenue and the rise of the Internet and social media platforms.

POPULAR CULTURE, LANGUAGE AND POLITICS (COMM318)

Credits: 15 / Semester: semester 2

The module explores how popular culture can be political by examining a range of popular cultural commodities discursively. The module surveys a range of views on how to examine popular culture in order to contextualise discourse analysis. This is examined and then used to critically consider the political potential of popular culture. Successful students will be able to critically analyse a range of popular cultural commodities such as film, television programmes, digital popular culture, popular music and the tabloid press. The module is delivered in the forms of lectures and more hands on analysis during seminars. Students are assessed by an essay, which is an analysis of a popular culture commodity.

SCHOOL OF THE ARTS WORK PLACEMENTS MODULE (SOTA300)

Credits: 30 / Semester: whole session

This module is an opportunity for you to undertake a placement in a setting which matches your academic and possible career/industry interests, develop materials and/or undertake tasks within a practical or vocational context, apply academic knowledge from your degree, and develop your personal and employability skills within a working environment. SOTA300 is not open to students who have taken SOTA600.

VIRAL VIDEO (COMM342)

Credits: 30 / Semester: whole session

This module offers students a blend of theoretical knowledge and practical production skills enabling the design, production and marketing of 'viral videos'. Students develop their own creative practice and take a highly active role in designing, presenting and producing their own videos, and promoting them through video-sharing and social media networks.

Viral videos are an important and rapidly evolving cultural phenomenon. As yet there is little consensus on a definition but essentially they are videos that gain popularity by being shared and recommended through online and offline sharing and recommendations (France et al 2016: 20).

The module is aimed at students considering a career in digital communications, public relations and corporate, political and third sector communications.

France, S., Vaghefi, M. and Zhao, H. (2016) Characterizing viral videos: Methodology and applications. Electronic Commerce Research and Applications 19: 19–32.

ISSUES IN 'CULT' TELEVISION (COMM300)

Credits: 15 / Semester: semester 2

This module focuses on debates about the nature, cultural television practices and significance of 'cult' television. Students will critique the idea of 'cult' from textual, industry and audience perspectives, as well as considering its relationships with the rise of 'quality' TV forms in the US and UK and with fan studies, including tracing shifts in representation and audience practices related to marginal groups and identities.

SCREEN INDUSTRIES AND SPORTS (COMM326)

Credits: 15 / Semester: semester 2

Screen Industries and Sports is a new module that aims to examine the complex and multifaceted relationship between screen media and sports, focusing primarily on the ways in which the screen industries engage with sports as a commercial product that reaches audiences globally through a proliferation of legacy and digital media. In doing this the module asks questions about how sports are produced, packaged and disseminated, how global media corporations increasingly control sports and the kinds of issues that are at stake. It is organised around 4 blocks, with the first block examining primarily the relationship between the television industries and sports, the second looking at how the relationship between sports and screen media is being reconfigured in the digital arena, the third on how mega sports events shape and are being shaped by screen industries and the final one focusing on issues of diversity and cultural difference and how they figure in the broader picture. Together, all these sessions are designed to provide students with an in-depth understanding of how screen industries are intricately linked to the evolution of sports as one of the most commercial media products of the 20th and 21st century.

Programme details and modules listed are illustrative only and subject to change.

HOW YOU'LL LEARN

Weekly lectures and seminar discussions may be supplemented by screening sessions, presentations and opportunities for group work where appropriate. We regularly invite expert speakers and practitioners to speak to our students about their work. Some modules also make use of our specialist equipment or software.

Dissertation and work placement modules involve more independent study, but always under the careful individual supervision of a member of academic staff.

HOW YOU'RE ASSESSED

We are committed to using a range of different forms of assessment, so types of assessment vary widely from module to module. Depending on your choice of modules, these may include coursework projects, essays, blogs, reports, literature reviews, writing exercises, presentations, online tests and unseen examinations.

LIVERPOOL HALLMARKS

We have a distinctive approach to education, the Liverpool Curriculum Framework, which focuses on research-connected teaching, active learning, and authentic assessment to ensure our students graduate as digitally fluent and confident global citizens.

Careers and employability

This degree will open you to a myriad of jobs in media-related industries and you will have opportunities to undertake a relevant work placement or their own independent research.

Many of our modules seek to develop practical skills – such as media writing, blogging, analysis of social media data and video-making.

Our graduates have gone on to careers including:

- Broadcasting and journalism
- Social media, advertising and marketing
- Corporate communications and public relations
- Arts administration
- Political campaigning (including political parties, trade unions and charities)
- Management
- Government, and the civil service
- Teaching in universities, colleges and schools.

Former graduates include a television documentary maker, a BBC Radio 1 DJ, senior journalists at local and national newspapers, a partner in a New York-based advertising company and the features editor of a music weekly.

Fees and funding

Your tuition fees, funding your studies, and other costs to consider.

TUITION FEES

UK fees (applies to Channel Islands, Isle of Man and Republic of	Ireland)
Full-time place, per year	£9,250

International fees	
Full-time place, per year	£22,400

Fees are correct for the academic year 2024/25

Tuition fees cover the cost of your teaching and assessment, operating facilities such as libraries, IT equipment, and access to academic and personal support. <u>Learn more about tuition fees, funding and student finance</u>.

ADDITIONAL COSTS

We understand that budgeting for your time at university is important, and we want to make sure you understand any course-related costs that are not covered by your tuition fee. This could include buying a laptop, books, or stationery.

Find out more about the <u>additional study costs</u> that may apply to this course.

SCHOLARSHIPS AND BURSARIES

We offer a range of scholarships and bursaries to provide tuition fee discounts and help with living expenses while at university.

Check out our <u>Undergraduate Global Advancement Scholarship</u>. This offers a tuition fee discount of up to £5,000 for eligible students starting an undergraduate degree from September 2024. There's also <u>the Liverpool Bursary</u> which is worth £2,000 per year for eligible students.

Discover our full range of undergraduate scholarships and bursaries		

Entry requirements

The qualifications and exam results you'll need to apply for this course.

Your qualification	Requirements About our typical entry requirements
A levels	ABB Applicants with the Extended Project Qualification (EPQ) are eligible for a reduction in grade requirements. For this course, the offer is BBB with an A in the EPQ. You may automatically qualify for reduced entry requirements through our contextual offers scheme .
GCSE	4/C in English and 4/C in Mathematics
Subject requirements	Applicants with the Extended Project Qualification (EPQ) are eligible for a reduction in grade requirements. For this course, the offer is BBB with an A in the EPQ.
BTEC Level 3 National Extended Diploma	BTEC applications are encouraged. We evaluate each BTEC application on its merits and may make offers at DDM.
Irish Leaving Certificate	H1, H2, H2, H3, H3
Scottish Higher/Advanced Higher	ABB in Advanced Highers, combinations of Advanced Highers and Scottish Highers are welcome
Welsh Baccalaureate Advanced	Accepted including two A levels at BB.

Your qualification	Requirements About our typical entry requirements
Access	Applications considered. Pass Access with 30 Level 3 credits graded at Distinction and 15 Level 3 credits graded at Merit.
International qualifications	Many countries have a different education system to that of the UK, meaning your qualifications may not meet our entry requirements. Completing your Foundation Certificate, such as that offered by the University of Liverpool International College , means you're guaranteed a place on your chosen course.

ALTERNATIVE ENTRY REQUIREMENTS

- If your qualification isn't listed here, or you're taking a combination of qualifications, contact us for advice
- <u>Applications from mature students</u> are welcome.
