

Veterinary Science BVSc

COURSE DETAILS

- A level requirements: [AAA](#)
- UCAS code: D100
- Study mode: Full-time
- Length: 5 years

KEY DATES

- Apply by: [16 October 2023](#)
- Starts: 23 September 2024

Course overview

Our course is designed to create practical, compassionate and resilient veterinary surgeons and to equip our graduates with the skills and qualities required to practice in the 21st century.

INTRODUCTION

INTRODUCTION

The Bachelor of Veterinary Science (BVSc) programme offers world-leading scientific and clinical training in veterinary medicine. The BVSc is internationally accredited and on graduation, you will be qualified to practise as a veterinary surgeon in the UK (RCVS), Ireland and Europe (EAEVE), Australia and New Zealand (AVBC), South Africa (SAVC), North America (AVMA) and many other countries around the world.

Our students get to enjoy a vibrant university experience for the first three years of the course, based at the central Liverpool campus. Years 4 and 5 are based at our Leahurst site, on the stunning Wirral, with North Wales on your doorstep.

Liverpool vet school offers in-depth clinical and research-based training and a hugely motivated, dedicated teaching staff. The university provides all of its own teaching across all five years of the course, using our two farms (covering beef and dairy cattle, pigs and sheep), our own teaching horses and our own teaching clinics. Across these sites our students have access to over 10,000 small animal cases a year, and over 5,000 equine and large animal cases.

Programme in detail

Our integrated spiral curriculum offers an innovative approach to teaching and learning, where subjects are revisited year on year with an increasing focus on clinical application as

the course progresses.

Your study will commence with animal handling, the science of normal structure and function, the welfare and husbandry of animals and the incidence and distribution of disease.

You will continue to build on this knowledge in second year, adding pathology and parasitology, further practical techniques and learning about veterinary research in our research skills course. In third year, you will study pathology and parasitology in more detail start the clinical science course and complete a research project, allowing you to study an area of interest in much more detail.

You will begin learning and using clinical skills from day one, taking advantage of our dedicated facilities to practise the essential techniques required in every field of veterinary practice such as bandaging, injection technique, lab analysis, suturing and knot tying.

Our professional skills thread also starts in year one. You will learn how to communicate effectively with others, in both written and spoken form, and you will get to put this into practice with professional actors who act as your clients in simulated veterinary consultations. You will also learn about the importance of practice finance and how veterinary businesses operate.

In fourth year, you will move to Leahurst. You will complete a lecture based clinical theory course by the February of fourth year and then complete 36 weeks of clinical rotations spread equally between production animal, equine and small animals with a dedicated rotation in exotics medicine. Over 90% of rotations take place at the Leahurst Campus, with students additionally gaining front line experience in commercial practices during their 26 weeks of extra-mural studies (EMS).

During clinical rotations, you will have the opportunity to join a 3-month exchange programme with one of our seven partner vet schools in Europe and the USA

Following your clinical rotations, you will have the chance to choose an elective subject to study in greater depth.

You also have the opportunity to take a year out from the veterinary science programme to study in China or for an additional, intercalated degree. A wide variety of subjects are available, both at Liverpool and other universities in the UK and abroad, and examples range from basic sciences to our world-renowned BSc in [Veterinary Conservation Medicine](#).

WHAT YOU'LL LEARN

- A core foundation in basic and clinical science which will support development of clinical reasoning and practical skills
- Animal handling and essential techniques required in every field of veterinary practice such as physical examination, injection technique and lab analysis.
- An understanding of the role of animals in human health
- The role of vets in the treatment and prevention of disease in individual animals and populations
- Development of professional skills to enable engagement with all aspects of veterinary science and clinical practice.
- The knowledge, expertise and attitudes required for a 21st century career in clinical or academic veterinary practice, business or scientific research.

Course content

Discover what you'll learn, what you'll study, and how you'll be taught and assessed.

YEAR ONE

- Animal husbandry and welfare
- Infectious diseases
- Normal structure and function
- Professional, clinical and study skills
- Public health and epidemiology

Programme details and modules listed are illustrative only and subject to change.

YEAR TWO

- Animal husbandry
- Infectious diseases
- Normal structure and function
- Professional, clinical and research skills
- Public health and epidemiology

Programme details and modules listed are illustrative only and subject to change.

YEAR THREE

- Management of disease, pathology and parasitology, Professional (including business), clinical and research skills, public health and epidemiology.

Programme details and modules listed are illustrative only and subject to change.

YEAR FOUR

- Clinical rotations
- Management of disease

Programme details and modules listed are illustrative only and subject to change.

YEAR FIVE

- Clinical rotation
- Electives

Programme details and modules listed are illustrative only and subject to change.

HOW YOU'LL LEARN

There is a combination of problem-based learning, didactic teaching and small-group practical classes allowing students to develop lifelong learning techniques.

LIVERPOOL HALLMARKS

We have a distinctive approach to education, the Liverpool Curriculum Framework, which focuses on research-connected teaching, active learning, and authentic assessment to ensure our students graduate as digitally fluent and confident global citizens.

Careers and employability

Studying this degree will prepare you for a wide range of careers in animal sciences and the vast majority of veterinary students find employment within six months of graduation.

Most newly qualified vets choose to work in private veterinary practices but many graduates find work in:

- Laboratories
- Animal charities
- The public health sector
- Research
- Higher degrees like PhDs, or further studies in particular veterinary specialities.

You can explore the following postgraduate opportunities here at Liverpool:

- Veterinary Science MSc
- Veterinary Science PhD/MPhil/DVSc
- Bovine Reproduction DBR
- RCVS/Certificate in Advance Veterinary Practice.

100% OF VETERINARY SCIENCE STUDENTS FIND THEIR MAIN ACTIVITY AFTER GRADUATION MEANINGFUL.

Graduate Outcomes, 2018-19.

Fees and funding

Your tuition fees, funding your studies, and other costs to consider.

TUITION FEES

UK fees (applies to Channel Islands, Isle of Man and Republic of Ireland)	
Full-time place, per year	£9,250

International fees	
Full-time place, per year	£42,700

Fees are correct for the academic year 2024/25

Tuition fees cover the cost of your teaching and assessment, operating facilities such as libraries, IT equipment, and access to academic and personal support. [Learn more about tuition fees, funding and student finance.](#)

ADDITIONAL COSTS

We understand that budgeting for your time at university is important, and we want to make sure you understand any course-related costs that are not covered by your tuition fee. This could include buying a laptop, books, or stationery.

Find out more about the [additional study costs](#) that may apply to this course.

SCHOLARSHIPS AND BURSARIES

We offer a range of scholarships and bursaries to provide tuition fee discounts and help with living expenses while at university.

Check out our [Undergraduate Global Advancement Scholarship](#). This offers a tuition fee discount of up to £5,000 for eligible students starting an undergraduate degree from September 2024. There's also [the Liverpool Bursary](#) which is worth £2,000 per year for eligible students.

Entry requirements

The qualifications and exam results you'll need to apply for this course.

Information for prospective applicants

Please refer to the [Veterinary Science Prospective Applicants page](#) for important guidance notes and detailed information for BVSc (D100) applicants.

Applicants to Veterinary Science should be aware that students will be required as part of the registration process at the start of their studies to undergo an occupational health assessment.

Your qualification	Requirements About our typical entry requirements
A levels	<p>AAA including Biology, one other academic science related subject and any other subject excluding General Studies, Critical Thinking and Citizenship Studies. If Chemistry is not offered at A level, grade B at AS level is required.</p> <p>You may automatically qualify for reduced entry requirements through our contextual offers scheme.</p> <p>If you don't meet the entry requirements, you may be able to complete a foundation year which would allow you to progress to this course.</p> <p>Available foundation years:</p> <ul style="list-style-type: none">• Foundation to Human and Animal Health Professions (Veterinary Science) (Year 0) BVSc
GCSE	<p>At least five GCSEs at grade 7 (A) including two science GCSEs (either as separate subjects or e.g. dual award science). With at least a grade 6 (B) in English (literature or language) and Mathematics.</p>
Subject requirements	<p>For applicants from England: Where a science has been taken at A level (Chemistry, Biology or Physics), a pass in the Science practical of each subject will be required.</p>
BTEC Level 3 National	<p>We no longer accept BTEC qualifications.</p>

Your qualification	Requirements About our typical entry requirements
Extended Diploma	
International Baccalaureate	36 points overall to include, Grade 6 at Higher Level Biology, Grade 6 at Higher Level Chemistry, Grade 6 at Higher Level in any other subject.
Irish Leaving Certificate	The recognised A level equivalent qualification is the Irish Higher Leaving Certificate. H1, H1, H2, H2, H2, H2 (new grading system) OR A1, A1, A1, A1 (old grading system). Biology: (H1); Chemistry: (H1); English: (O3 at Ordinary Level or H6 at Higher Level); Maths: (O3 at Ordinary Level/Standard Level or H6 at Higher Level).
Scottish Higher/Advanced Higher	Not accepted without Advanced Highers. Grade B in Biology at Advanced Higher, Grade B in Chemistry at Advance Higher, Grade AA in Biology and Chemistry and Grades AAB in 3 other subjects at Higher Level.
Welsh Baccalaureate Advanced	Accepted in place of a third A level
Access	Kitemarked level 3 Access to Medicine at pre-approved colleges is required with a minimum of 15 credits in Biology and a minimum of 15 credits in Chemistry. Approval MUST be obtained prior to application. Please contact the Admissions Office for further information.
Work Experience Requirements	Candidates should have work experience in both animal husbandry and clinical (veterinary practice) setting. For more information, please see the Veterinary Science Prospective Applicants page .
International qualifications	

Your qualification	Requirements About our typical entry requirements
	Many countries have a different education system to that of the UK, meaning your qualifications may not meet our entry requirements.

ALTERNATIVE ENTRY REQUIREMENTS

- If your qualification isn't listed here, or you're taking a combination of qualifications, [contact us](#) for advice
- [Applications from mature students](#) are welcome.
