About this course

The world we live in is dominated by media in many forms. From entertainment and culture, through news and social media, to politics and promotion: the media shapes our understanding of what we know and what we consume. Whether you want to work in one of these areas, to research their impact or simply to understand more about our relationship with media, this programme provides a thorough introduction with plenty of opportunities to develop specialist skills.

Introduction

During your first year, you will develop your foundational understanding and academic skills through core modules in media, communication and language.

As your degree progresses, you will have the opportunity to tailor your studies through a wide range of optional modules in topics such as political communication, screen media, virtual worlds, digital cultures, media writing, language and public relations. These options will allow you to pursue your own interests and focus on particular media and communication forms, analysing how they are organised as text, how they represent the world to us and ourselves to the world (from global power politics to constructions of individual identity), and how the media industries are organised to produce and profit from them.

In your second and final years, a suite of dedicated modules will teach you to acquire strong research skills, which you'll be given the opportunity to put into practice through independent or collaborative research. Our final year module 'Viral Video' enables students to develop practical skills in videomaking. Check out their efforts on our dedicated [YouTube page](#), or search 'Media/Pool'.

All of our single honours programmes share a [common first year](#) consisting of four compulsory modules, giving you the flexibility to change to another one of our programmes at the end of your first year.

Year in industry

This programme is available with an optional [year in industry](#). If you choose this option, year three is spent on a paid placement within an organisation in industry, broadly defined. You will be supported by the School of the Arts and the Department throughout, and your reflexive written account of the experience will contribute towards your final degree result. If you wish to study this programme with a year in industry, please put the option code 'YI' in the 'further choices' section of your UCAS application form.

These introduce key ideas and theories in Communication and Media and offer a basic understanding of many of the key areas of the subject in which you may choose to specialise later on. Besides introducing students to Communication & Media as a subject, our first year is designed to support you as you acquire and practice the academic and analytical skills you will need to succeed as a student and in your chosen career.

For example, you can delve more deeply into film and the entertainment industry, the representation of self and society, or the interplay between global media and war. Or

you can explore some of the practices associated with media writing and promotional media.

You will take two modules that will introduce you to academic research and support you to practice and develop your research skills.

Most of our year two modules are offered in 15-credit and 30-credit versions so, for simplicity, the list below only includes 30-credit versions.

Some modules encourage you to deepen your understanding of the topics studied in year two, but you can also learn to study magazines and design your own, explore how media represent human rights issues or the environment, or discover areas as diverse as photography, strategic communication or queer film, for example. All of our students undertake a project involving their own sustained, research-based work in their final year, whether by taking the Dissertation module, collaborating on staff research, producing brief videos to client or by applying the skills you have learned by taking our Work Placement module.

Combined degree

Choosing this subject as a combined degree

Media coverage represents the most important method for communicating key issues and developments in most subject areas to the wider world, so Communication and Media makes an excellent partner for 50:50 combinations with another subject of your choice. This means that you will find plenty of opportunities for crossover between your other subject and Communication and Media, but you will still study core modules from both. In Communication and Media, the full range of our modules will be open to you in years two and three.

Teaching and assessment

How you'll learn

Weekly lectures and seminar discussions may be supplemented by screening sessions, presentations and opportunities for group work where appropriate. We regularly invite expert speakers and practitioners to speak to our students about their work. Some modules also make use of our specialist equipment or software.

Dissertation and work placement modules involve more independent study, but always under the careful individual supervision of a member of academic staff.

How you're assessed

We are committed to using a range of different forms of assessment, so types of assessment vary widely from module to module. Depending on your choice of modules, these may include coursework projects, essays, blogs, reports, literature reviews, writing exercises, presentations, online tests and unseen examinations.
