UNIVERSITY OF LIVERPOOL

MSc (Eng)

Biomedical Engineering

Study mode	Duration	
Full-time	12 months	Apply by: **11 September 2026** Starts on: **28 September 2026**

About this course

Discover the principles and technologies that have led to biomedical engineering becoming essential in healthcare, medicine and human biology. Suitable for graduates in engineering or physical sciences, this master's degree combines knowledge of biomechanics and fluid mechanics in the human body with engineering design innovations.

Introduction

Biomedical engineering, the application of engineering knowledge and skills to healthcare, medicine and human biology, is the fastest growing engineering discipline worldwide.

Contributing to the future development of artificial organs, medical devices and novel treatments, the School of Engineering is home to internationally recognised, ground-breaking research in biomedical engineering. This programme harnesses this expertise in key areas around biomechanics, cardiovascular fluid mechanics, tissue engineering, biomaterials, engineering design and manufacturing.

You'll discover how to measure and analyse human movement, learn the principles of blood flow and the role of different bio-fluids in the human body, and gain an understanding of the structures and properties of materials used in medical devices.

Immersing you in computer aided design and engineering product design, we'll introduce the latest 3D tools and techniques and task you with the development of innovative products and creative solutions.

Accredited by the Institution of Mechanical Engineers, the programme includes a supervised independent research project. This provides the opportunity to enhance your skills and knowledge in an area of biomedical engineering of your choice, supported by our specialist research facilities.

Who is this course for?

This programme is designed for engineers and physical scientists who want to develop specialist skills and knowledge in biomedical engineering.

What you'll learn

- Cardiovascular fluid mechanics in the human body, including the importance of blood flow
- Biomechanics of the musculoskeletal system, including how to measure and analyse human movement
- The structures and properties of materials used in medical devices
- Applications of tissue engineering to the development of the next generation of smart-implantable medical devices
- Key principles of engineering product design
- The statistical principles of radiation detectors
- Computer aided design methodologies, tools and techniques
- Physics and biological principles which underpin medical physics and clinical engineering
- Material manufacturing and processing technologies
- Transferable skills in problem solving, critical analysis, teamwork and communication.

Accreditation

This programme is accredited by the Institute of Mechanical Engineering (IMechE), the professional body for mechanical engineers in the UK. This means that successful completion of the programme will put you on track to gain Chartered Engineer (CEng) status in the UK.

Accreditation in detail

Institution of Mechanical Engineers

All mechanical engineering programmes are accredited, or pending accreditation, by the Institution of Mechanical Engineers. This is the professional body for Mechanical Engineers. Our programmes are a recognised qualification on the route to Chartered Engineer status.

Course content

Discover what you'll learn, what you'll study, and how you'll be taught and assessed.

Semester one

Module MECH401 Group Engineering Design spans semesters one and two.

All students will undertake a diagnostic test to assess technical writing proficiency. Passing students will have the option to take module MECH452 Finite Element Analysis instead of module ENGG596 Technical Writing for Engineers in Semester One.

Students will choose optional modules equivalent to 30 credits. Only an imbalance of up to 15 credits between the two semesters is permitted.

Modules

Compulsory modules	Credits
TECHNICAL WRITING FOR ENGINEERS (ENGG596)	7.5
STRUCTURAL BIOMATERIALS (MATS410)	15
COMPUTER AIDED DESIGN (MNFG604)	7.5
GROUP ENGINEERING DESIGN (MECH401)	15
CARDIOVASCULAR PHYSIOLOGY AND MECHANICS (ENGG415)	15

Optional modules	Credits
ADDITIVE MANUFACTURING (MNFG603)	15

Optional modules	Credits
MATERIALS PROCESSING AND SELECTION (MATS520)	15
FINITE ELEMENT ANALYSIS (MECH452)	7.5

Programme details and modules listed are illustrative only and subject to change.

Semester two

Module MECH401 Group Engineering Design spans semesters one and two.

Students will choose optional modules totalling 30 credits. Only an imbalance of up to 15 credits between the two semesters is permitted.

Modules

Compulsory modules	Credits
MUSCULOSKELETAL BIOMECHANICS (ENGG410)	15
TISSUE ENGINEERING (ENGG412)	15
GROUP ENGINEERING DESIGN (MECH401)	15

Optional modules	Credits
INTRODUCTION TO ETHICS FOR BIO-SCIENCE AND BIO-ENGINEERING & TECHNOLOGY (MDSC418)	15
ADVANCED SMART MATERIALS (MATS525)	15
ADVANCED MANUFACTURING WITH LASERS (MECH607)	15

Optional modules	Credits
ADVANCED ENGINEERING MATERIALS (MATS631)	15

Programme details and modules listed are illustrative only and subject to change.

Final project

You will undertake your research project over the summer.

Modules

Compulsory modules	Credits
MSC(ENG) PROJECT (60 CREDITS) (ENGG660)	60

Programme details and modules listed are illustrative only and subject to change.

Teaching and assessment

How you'll learn

You'll be taught through a combination of traditional lectures and practical classes, benefitting from research-led teaching and active learning methods.

There will be a mixture of lectures, seminars, tutorials, laboratory work, demonstrations, problem-solving exercises, group projects and independent study.

How you're assessed

You'll be assessed through a combination of written exams, class tests and coursework.

Coursework-based assignments include essays, reports, oral presentations, mini-project work, key skills exercises and a dissertation.

Liverpool Learning Framework

At Liverpool, we take a distinctive approach to education through the Liverpool Learning Framework. This means teaching that is engaging, inclusive and designed to help you succeed during your studies and beyond.

You'll develop specialist subject knowledge alongside the skills employers value most, including:

- Digital fluency
- Confidence
- Global citizenship

Our curriculum is characterised by the three Liverpool Hallmarks:

- Research-connected teaching - learning informed by the latest ideas and discoveries
- Active learning - taking part, applying knowledge and learning by doing
- Authentic assessment - assessments designed around real-world tasks and challenges

We also embed key priorities across our curriculum, including AI literacy, employability, and sustainability, helping you prepare for the future and make a positive impact in the world.

We're committed to creating a supportive and inclusive learning environment where every student can thrive.

Careers and employability

Whether you're seeking a career designing medical devices or assistive technologies, focusing on research and development, or working in engineering management or consultancy, this MSc (Eng) will prepare you for a variety of opportunities in the UK and abroad.

The programme includes a strong practical element and incorporates the latest academic and industry research, preparing you to work effectively at the forefront of engineering.

Our professional accreditation with the Institution of Mechanical Engineers means you'll graduate with a recognised qualification on the route to Chartered Engineer status.

You'll graduate from this MSc (Eng) ready for a career in medical device design and manufacture, academic research, and engineering management or consultancy.

Previous biomedical engineering graduates have gone onto careers working for medical device companies, pharmaceutical companies, and the National Health Service and other healthcare providers.

Their career destinations include working for companies such as:

- 3D LifePrints
- Fusion Implants
- AstraZeneca
- National Health Service.

You'll also be well placed to pursue PhD study. Some of our previous graduates have secured fully-funded PhD studentships.

Fees and funding

Your tuition fees, funding your studies, and other costs to consider.

Tuition fees

UK fees (applies to Channel Islands, Isle of Man and Republic of Ireland)

Full-time place, per year - £14,000

International fees

Full-time place, per year - £34,000

Tuition fees are for the academic year 2026/27.

Tuition fees cover the cost of your teaching and assessment, operating facilities such as libraries, IT equipment, and access to academic and personal support.

- You can pay your tuition fees in instalments.
- All or part of your tuition fees can be funded by external sponsorship.
- International applicants who accept an offer of a place will need to pay a deposit.

If you're a UK national, or have settled status in the UK, you may be eligible to apply for a Postgraduate Loan worth up to £12,858 to help with course fees and living costs. **Learn more about paying for your studies**.

Additional costs

We understand that budgeting for your time at university is important, and we want to make sure you understand any course-related costs that are not covered by your tuition fee. You can find information on the general and subject-specific costs you could expect to incur on our study costs webpage.

Entry requirements

The qualifications and exam results you'll need to apply for this course.

Postgraduate entry requirements

We accept a 2:2 honours degree from a UK university, or an equivalent academic qualification from a similar non-UK institution. This degree should be in Engineering or Physical Sciences and should provide appropriate knowledge of core engineering science topics.

International qualifications

Select your country or region to view specific entry requirements.

Many countries have a different education system to that of the UK, meaning your qualifications may not meet our entry requirements. Completing your Foundation Certificate, such as that offered by the University of Liverpool International College, means you're guaranteed a place on your chosen course.

English language requirements

You'll need to demonstrate competence in the use of English language, unless you're from a majority English speaking country.

We accept a variety of international language tests and country-specific qualifications.

International applicants who do not meet the minimum required standard of English language can complete one of our Pre-Sessional English courses to achieve the required level.

IELTS

6.5 overall, with no component below 6.0

TOEFL iBT

If you took a TOEFL test on or before 20 January 2026, you'll need 88 overall, with minimum scores of listening 19, writing 19, reading 19 and speaking 20. If you took a TOEFL test from 21 January 2026 onwards, when a new scoring system was introduced, you'll need 4.5 overall, with 4 or above in all components. TOEFL Home Edition not accepted.

Duolingo English Test

125 overall, with writing not less than 125, speaking and reading not less than 115, and listening not below 110. For academic year 2025/26 only, we will also accept the production, literacy, comprehension and conversation score set: 120 overall, with no component below 105.

Pearson PTE Academic

61 overall, with no component below 59

LanguageCert Academic

70 overall, with no skill below 65

PSI Skills for English

B2 Pass with Merit in all bands

INDIA Standard XII

National Curriculum (CBSE/ISC) - 75% and above in English. Accepted State Boards - 80% and above in English.

WAEC

C6 or above

Pre-sessional English

Do you need to complete a Pre-sessional English course to meet the English language requirements for this course?

The length of Pre-sessional English course you'll need to take depends on your current level of English language ability.

Pre-sessional English in detail

If you don't meet our English language requirements, we can use your most recent IELTS score, or the equivalent score in selected other English language tests, to determine the length of Pre-sessional English course you require.

Use the table below to check the course length you're likely to require for your current English language ability and see whether the course is available on campus or online.

Your most recent IELTS score	Pre-sessional English course length	On campus or online
6.0 overall, with writing at 6.0 and no component below 5.5	6 weeks	On campus or online
5.5 overall, with writing at 5.5 and no component below 5.0	10 weeks	On campus or online
5.5 overall, with no more than one component at 5.0	12 weeks	Online
5.5 overall, with no component below 5.0	20 weeks	On campus
5.0 overall, with no more than one component at 4.5	30 weeks	On campus
4.5 overall, with no more than one component at 4.0	40 weeks	On campus

If you've completed an alternative English language test to IELTS, we may be able to use this to assess your English language ability and determine the Pre-sessional English

course length you require.

Please see our guide to Pre-sessional English entry requirements for IELTS 6.5 overall, with no component below 6.0, for further details.
