

MSc (Eng)

Biomedical Engineering with Management (Healthcare)

Study mode

Full-time

Duration

12 months

Apply by: **11 September 2026**Starts on: **28 September 2026**

About this course

Discover the principles and technologies that have led to biomedical engineering becoming essential in healthcare, medicine and human biology. Suitable for intercalating medical students and graduates in life sciences, this master's degree combines knowledge of biomechanics and fluid mechanics in the human body with engineering design innovations and a modern management toolkit.

Introduction

Biomedical engineering, the application of engineering knowledge and skills to healthcare, medicine and human biology, is the fastest growing engineering discipline worldwide.

Contributing to the future development of artificial organs, medical devices and novel treatments, the School of Engineering is home to internationally recognised, ground-breaking research in biomedical engineering. This programme harnesses this expertise in key areas around biomechanics, cardiovascular fluid mechanics, tissue engineering, biomaterials, engineering design and manufacturing.

You'll discover how to measure and analyse human movement, learn the principles of blood flow and the role of different bio-fluids in the human body, and gain an understanding of the

structures and properties of materials used in medical devices.

Immersing you in computer aided design and engineering product design, we'll introduce the latest 3D tools and techniques and task you with the development of innovative products and creative solutions. We'll also focus on modern management, including examining organisational behaviour and enhancing your project management skills.

Accredited by the Institution of Mechanical Engineers, the programme includes a supervised independent research project. This provides the opportunity to enhance your skills and knowledge in an area of biomedical engineering of your choice, supported by our specialist research facilities.

Who is this course for?

This programme is designed for intercalating medical students and graduates in life science subjects who want to develop specialist skills and knowledge in biomedical engineering. You'll combine this expertise with insights into effective leadership and management.

What you'll learn

- Cardiovascular fluid mechanics in the human body, including the importance of blood flow
- Biomechanics of the musculoskeletal system, including how to measure and analyse human movement
- The structures and properties of materials used in medical devices
- Applications of tissue engineering to the development of the next generation of smart-implantable medical devices
- Key principles of engineering product design
- Computer aided design methodologies, tools and techniques
- Material manufacturing and processing technologies
- Transferable skills in problem solving, critical analysis, teamwork and communication
- Modern management tools and insights, including industrial psychology and organisational behaviour
- Fundamental techniques in project management, risk management and cost management
- Entrepreneurial concepts, activities and challenges.

Accreditation

This programme is accredited by the Institute of Mechanical Engineering (IMechE), the professional body for mechanical engineers in the UK. This means that successful completion of the programme will put you on track to gain Chartered Engineer (CEng) status in the UK.

Accreditation in detail

Institution of Mechanical Engineers

All mechanical engineering programmes are accredited, or pending accreditation, by the Institution of Mechanical Engineers. This is the professional body for Mechanical Engineers. Our programmes are a recognised qualification on the route to Chartered Engineer status.

Course content

Discover what you'll learn, what you'll study, and how you'll be taught and assessed.

Semester one

Module MECH401 Group Engineering Design spans semesters one and two.

A total of 22.5 credits of optional modules are typically selected across semesters one and two. However, intercalating medical students are exempt from ENGG411 Cardiovascular Bioengineering, an otherwise compulsory module in semester two, and will therefore study 30 credits of optional modules.

Modules

Compulsory modules	Credits
STRUCTURAL BIOMATERIALS (MATS410)	15
COMPUTER AIDED DESIGN (MNFG604)	7.5
PROJECT MANAGEMENT (MNGT502)	7.5
ADVANCED MODERN MANAGEMENT (MNGT352)	7.5
GROUP ENGINEERING DESIGN (MECH401)	15
TECHNICAL WRITING FOR ENGINEERS (ENGG596)	7.5
CARDIOVASCULAR PHYSIOLOGY AND MECHANICS (ENGG415)	15

Optional modules	Credits
ADVANCED ENGINEERING MATERIALS (MATS301)	7.5
MATERIALS PROCESSING AND SELECTION (MATS520)	15
ADDITIVE MANUFACTURING (MNFG610)	7.5

Programme details and modules listed are illustrative only and subject to change.

Semester two

Module MECH401 Group Engineering Design spans semesters one and two.

A total of 22.5 credits of optional modules are typically selected across semesters one and two. However, intercalating medical students are exempt from ENGG411 Cardiovascular Bioengineering, an otherwise compulsory module in semester two, and will therefore study 30 credits of optional modules.

Modules

Compulsory modules	Credits
MUSCULOSKELETAL BIOMECHANICS (ENGG410)	15
TISSUE ENGINEERING (ENGG412)	15
ENTERPRISE STUDIES (MNGT414)	7.5
GROUP ENGINEERING DESIGN (MECH401)	15
CARDIOVASCULAR PHYSIOLOGY AND MECHANICS (ENGG415)	15

Optional modules	Credits
ENERGY AND THE ENVIRONMENT (MECH433)	15
ADVANCED MANUFACTURING WITH LASERS (MECH607)	15
SMART MATERIALS (MATS515)	7.5

Programme details and modules listed are illustrative only and subject to change.

Final project

You will undertake your research project over the summer.

Modules

Compulsory modules	Credits
MSC(ENG) PROJECT (60 CREDITS) (ENGG660)	60

Programme details and modules listed are illustrative only and subject to change.

Teaching and assessment

How you'll learn

You'll be taught through a combination of traditional lectures and practical classes, benefitting from research-led teaching and active learning methods.

There will be a mixture of lectures, seminars, tutorials, laboratory work, demonstrations, problem-solving exercises, group projects and independent study.

How you're assessed

You'll be assessed through a combination of written exams, class tests and coursework. Coursework-based assignments include essays, reports, oral presentations, mini-project work, key skills exercises and a dissertation.

Liverpool Hallmarks

We have a distinctive approach to education, the Liverpool Curriculum Framework, which focuses on research-connected teaching, active learning, and authentic assessment to ensure our students graduate as digitally fluent and confident global citizens.

The Liverpool Curriculum framework sets out our distinctive approach to education. Our teaching staff support our students to develop academic knowledge, skills, and understanding alongside our **graduate attributes**:

- Digital fluency
- Confidence
- Global citizenship

Our curriculum is characterised by the three **Liverpool Hallmarks**:

- Research-connected teaching
- Active learning
- Authentic assessment

All this is underpinned by our core value of **inclusivity** and commitment to providing a curriculum that is accessible to all students.

Careers and employability

Whether you're seeking a career designing medical devices or assistive technologies, focusing on research and development, or working in engineering management or consultancy, this MSc will prepare you for a variety of opportunities in the UK and abroad.

The programme includes a strong practical element and incorporates the latest academic and industry research, preparing you to work effectively at the forefront of engineering.

Our professional accreditation with the Institution of Mechanical Engineers means you'll graduate with a recognised qualification on the route to Chartered Engineer status.

You'll graduate from this MSc ready for a career in medical device design and manufacture, academic research, and engineering management or consultancy.

Previous biomedical engineering graduates have gone onto careers working for medical device companies, pharmaceutical companies, and the National Health Service and other healthcare providers.

Their career destinations include working for companies such as:

- 3D LifePrints
- Fusion Implants
- AstraZeneca
- National Health Service.

You'll also be well placed to pursue PhD study. Some of our previous graduates have secured fully-funded PhD studentships.

Fees and funding

Your tuition fees, funding your studies, and other costs to consider.

Tuition fees

UK fees (applies to Channel Islands, Isle of Man and Republic of Ireland)

Full-time place, per year – £14,000

International fees

Full-time place, per year – £34,000

Tuition fees are for the academic year 2026/27.

Tuition fees cover the cost of your teaching and assessment, operating facilities such as libraries, IT equipment, and access to academic and personal support.

- You can pay your tuition fees in instalments.
- All or part of your tuition fees can be funded by external sponsorship.
- International applicants who accept an offer of a place will need to pay a tuition fee deposit.

If you're a UK national, or have settled status in the UK, you may be eligible to apply for a Postgraduate Loan worth up to £12,167 to help with course fees and living costs. **Learn more about paying for your studies**.

Additional costs

We understand that budgeting for your time at university is important, and we want to make sure you understand any course-related costs that are not covered by your tuition fee. This could include buying a laptop, books, or stationery.

Find out more about the additional study costs that may apply to this course.

Entry requirements

The qualifications and exam results you'll need to apply for this course.

Postgraduate entry requirements

We accept a 2:2 honours degree from a UK university, or an equivalent academic qualification from a similar non-UK institution. This degree should be in Life Sciences, Biomedical Sciences, Optometry, Anatomy or a closely related subject.

A level Mathematics or A level Physics is desirable.

International qualifications

[Select your country or region to view specific entry requirements.](#)

Many countries have a different education system to that of the UK, meaning your qualifications may not meet our entry requirements. Completing your Foundation Certificate, such as that offered by the [University of Liverpool International College](#), means you're guaranteed a place on your chosen course.

English language requirements

You'll need to demonstrate competence in the use of English language, unless you're from a [majority English speaking country](#).

We accept a variety of [international language tests](#) and [country-specific qualifications](#).

International applicants who do not meet the minimum required standard of English language can complete one of our [Pre-Sessional English courses](#) to achieve the required level.

IELTS

6.5 overall, with no component below 6.0

TOEFL iBT

If you took a TOEFL test on or before 20 January 2026, you'll need 88 overall, with minimum scores of listening 19, writing 19, reading 19 and speaking 20. If you took a TOEFL test from 21 January 2026 onwards, when a new scoring system was introduced, you'll need 4.5 overall, with 4 or above in all components. TOEFL Home Edition not accepted.

Duolingo English Test

125 overall, with writing not less than 125, speaking and reading not less than 115, and listening not below 110. For academic year 2025/26 only, we will also accept the production, literacy, comprehension and conversation score set: 120 overall, with no component below 105.

Pearson PTE Academic

61 overall, with no component below 59

LanguageCert Academic

70 overall, with no skill below 65

PSI Skills for English

B2 Pass with Merit in all bands

INDIA Standard XII

National Curriculum (CBSE/ISC) – 75% and above in English. Accepted State Boards – 80% and above in English.

WAEC

C6 or above

Pre-sessional English

Do you need to complete a Pre-sessional English course to meet the English language requirements for this course?

The length of Pre-sessional English course you'll need to take depends on your current level of English language ability.

Pre-sessional English in detail

If you don't meet our English language requirements, we can use your most recent IELTS score, or [the equivalent score in selected other English language tests](#), to determine the length of Pre-sessional English course you require.

Use the table below to check the course length you're likely to require for your current English language ability and see whether the course is available on campus or online.

Your most recent IELTS score	Pre-sessional English course length	On campus or online
6.0 overall, with writing at 6.0 and no component below 5.5	6 weeks	On campus or online
5.5 overall, with writing at 5.5 and no component below 5.0	10 weeks	On campus or online
5.5 overall, with no more than one component at 5.0	12 weeks	Online
5.5 overall, with no component below 5.0	20 weeks	On campus
5.0 overall, with no more than one component at 4.5	30 weeks	On campus
4.5 overall, with no more than one component at 4.0	40 weeks	On campus

If you've completed an alternative English language test to IELTS, we may be able to use this to assess your English language ability and determine the Pre-sessional English course

length you require.

Please see our guide to [Pre-sessional English entry requirements](#) for IELTS 6.5 overall, with no component below 6.0, for further details.
