

UNIVERSITY OF
LIVERPOOL

BDS

Dental Surgery

UCAS code A200

Entry requirements

A level: AAA

Study mode

Full-time

Duration

5 years

Apply by: **15 October 2025**

Starts on: **28 September 2026**

About this course

The University of Liverpool School of Dentistry offers a unique research-connected learning environment that is primarily focused on developing each individual, so that they can each realise their personal potential as well as qualify as a professional capable of providing compassionate, evidence-based, holistic dental care to patients.

Introduction

Welcome to the School of Dentistry.

Students from different dental disciplines have the opportunity to work side-by-side and develop their skills in state-of-the-art simulation suites. Student growth is supported by our world-leading learning technology systems that provide personalised developmental progress information so that learning needs can be tailored by the individual. This personalised and supportive approach enables our students to have early access to patients, in their first year, so that developing skills can be authentically consolidated and integrated in the real-world situation. At Liverpool we take a blended approach to learning; this means that we use some online learning but with a predominance of in-person face to face teaching.

The School's educational approach is driven by an ethos of continuous professional development because we strongly believe that our students need to learn how to continually adapt, so that they can appropriately respond to the current, as well as future, challenges in a dynamic world.

On successful completion of the programme you'll be granted a Bachelor of Dental Surgery degree that is registrable with the General Dental Council.

Programme in detail

This innovative programme has been specifically designed to facilitate the development of real-world clinical, team working, and leadership skills, along with essential personal growth. The BDS programme embraces the University's hallmarks of active learning, confidence, authentic assessment, and research-connected teaching, as well as having many notable and unique design elements.

The programme shares a three year Collaborative Learning Core (CLC) with dental therapy students, where learning and collaborating in teams builds mutual respect and understanding of the varied roles of the dental team. The remaining two years of the programme will prepare you to undertake the scope of practice of a dentist.

Components within the programme are closely integrated and provide clear steps for you to develop, integrate and demonstrate your skills before building to the next level of clinical capability. Clinical experience commences in the first year of the programme and is underpinned by aligned medical and anatomical knowledge; communication skills; professionalism; ethics and clinical safety.

During the programme, you will also have opportunities to experience and develop your skills in a primary and secondary care setting and engage with the local community. Quality improvement projects are also included in the programme to ensure an in-depth understanding of clinical governance.

Learning and assessment are supported by state-of-the-art technology to provide a personalised mechanism for monitoring your progress and allowing you to take control of your own learning.

Through embedding continuous personal development within the curriculum, you will understand the importance of self-reflection, goal setting and on-going professional development, an ethos aimed at ensuring that you will be prepared for the demands of both the profession and life after University.

Admissions procedures

To apply for a place on the Bachelor of Dental Surgery BDS programme, applicants should read the admissions document and submit it as per the instructions provided on the form.

What you'll learn

- The knowledge, skills and values essential for a confident dental career in a 21st-century healthcare environment.
- An understanding of the human body that will underpin your future skills.
- In-depth understanding of clinical governance.
- Communication skills, professionalism, ethics and clinical safety.
- The ability to provide holistic patient care in the context of the primary care services.
- How to provide compassionate, evidence-based, holistic dental care to patients.

Course content

Discover what you'll learn, what you'll study, and how you'll be taught and assessed.

Year one

The aim of the first year is to transition students to learning in higher education, whilst ensuring that they gain a core knowledge base, skills, and understanding, fit for learning in the clinical environment and their future careers.

Teaching of Clinical Sciences is designed to enable students to understand clinical practice. Problem based learning is used to guide students' understanding of the human body that will underpin their future skills. Teaching is supported through attendance to HARC (the University's Human Anatomy Resource Centre). Students receive teaching in personal development and wellbeing, communication skills, equality and diversity, management of medical emergencies, infection control, preventive care, and periodontal health, and patient care provision. Students develop their clinical skills via blended and simulation learning before attending clinic to deliver care to patients. Students observe and assist students in senior years in order to enhance their communication skills and prepare them for learning that lies ahead.

Programme details and modules listed are illustrative only and subject to change.

Year two

In year two, blended learning continues as established in year one. Students will expand upon their experience and skills to enable them to deliver a more diverse range of restorative care for child and adult patients. In addition to working within Restorative Care, they attend Paediatric, Oral Diseases, and Radiology clinics to develop further clinical and diagnostic skills, and to understand a range of acute systemic conditions with oral features that may present to the dental team.

Programme details and modules listed are illustrative only and subject to change.

Year three

In year three, students will develop skills in extraction of primary teeth, safeguarding, management of patient anxiety, dental trauma, management of pain, health promotion, quality improvement activity and in understanding clinical research. Students will attend placement in the General Dental Services. Teaching continues to enable students to apply the basic sciences in order to understand clinical practice, to safely manage medical emergencies, and to support their personal development and wellbeing.

Programme details and modules listed are illustrative only and subject to change.

Year four

In year four, students will expand their restorative and surgical skills to fulfil the complete remit of a dentist. This activity includes the extraction and pulpal management of permanent teeth, the replacement of missing teeth, and the restoration of teeth using laboratory made crowns and bridges. Students will attend placement in the Community Dental Services.

Programme details and modules listed are illustrative only and subject to change.

Year five

The final year is spent consolidating knowledge and gaining further clinical experience. Students will attend placement in the General Dental Services, in Oral and Maxillofacial Surgery at Aintree University Hospital, and in Paediatric Dentistry at Alder Hey Children's Hospital. Students will gain knowledge and skills in clinical governance, implant dentistry, whilst engaging with activities designed to prepare them to graduate to practice as a safe beginner with a career in dentistry.

Programme details and modules listed are illustrative only and subject to change.

Teaching and assessment

How you'll learn

Theoretical teaching on the programme is employed via a combination of blended learning approaches, such as problem-based learning (PBL), research skills development, personal development and wellbeing, communication skills, and flipped classrooms, all of which are supported by lectures. Practical teaching approaches include peer observation and assist, management of medical emergencies, attendance to the human anatomy resource centre, placements in primary and secondary care, simulated patients, and the supervised treatment of patients on clinic.

The School is at the forefront of technology enhanced learning. We use virtual learning environments to support small group and didactic learning, a digital feedback platform, and simulation of restorative and surgical techniques to provide our students with the best possible experience, whilst preparing them for the technological developments that will shape their future careers in healthcare.

We value the personal and professional development of our student colleagues. Each student is assigned an Academic Advisor to support their leadership development, self-reflection skills and their ability to set achievable goals. Students have the opportunity to stand for election to leadership roles within the School and to work with the Staff Student Liaison Committee to ensure the voice of the student is heard and to work with teaching colleagues to inform positive change. The School has a novel personal development and wellbeing module to further support this learning.

Many of our staff have received awards in recognition of our approach to teaching.

How you're assessed

The curriculum is built on milestones, which build in complexity each year. Students are assessed based on the milestones for that year of study, which spirally build on the knowledge they have gained in previous years.

The assessment strategy for the academic components of the programme adopts a varied approach including: Multi-response format; Constructed Answer; and OSCE (Observed Structured Clinical Examination).

All summative assessments are preceded by formative assessments, after which you will receive detailed feedback. With regards to clinical activity, students must pass an assessment of basic clinical competence before being allowed to use these newly acquired skills on a patient. From this point clinical activity is

continually monitored using a computerised data gathering tool. Outreach reports are also used to contextualise clinical monitoring. An important aspect of these assessments is their integrated nature, and their use in multiple clinics. This latter point is crucial to the fairness and robustness of the assessments.

Furthermore, the system ensures that all Liverpool graduates are in the advantageous position of being able to take their activity portfolio into the work place to aid their ongoing development. We use technology to facilitate online marking and feedback of assignments, deliver online tests, and collate and deliver OSCE data, providing students with more useful feedback as a result.

Liverpool Hallmarks

We have a distinctive approach to education, the Liverpool Curriculum Framework, which focuses on research-connected teaching, active learning, and authentic assessment to ensure our students graduate as digitally fluent and confident global citizens.

The Liverpool Curriculum framework sets out our distinctive approach to education. Our teaching staff support our students to develop academic knowledge, skills, and understanding alongside our **graduate attributes**:

- Digital fluency
- Confidence
- Global citizenship

Our curriculum is characterised by the three **Liverpool Hallmarks**:

- Research-connected teaching
- Active learning
- Authentic assessment

All this is underpinned by our core value of **inclusivity** and commitment to providing a curriculum that is accessible to all students.

^ [Back to top](#)

Careers and employability

There are a wide range of career opportunities within the profession. The majority of graduates will choose general dental practice within the NHS and in the private sector, whilst others might choose one of the hospital specialities, the community dental service, university teaching, or the armed forces.

Studying to become a dental professional encourages students to develop valuable, transferable skills which provide a strong foundation for their careers and their continuing professional development.

Key skills students will develop include:

- Communication skills (both oral and written)
- Critical reasoning skills
- Clinical skills
- Professionalism
- Team working
- Lifelong learning.

Fees and funding

Your tuition fees, funding your studies, and other costs to consider.

Tuition fees

UK fees (applies to Channel Islands, Isle of Man and Republic of Ireland)

Full-time place, per year – £9,790

International fees

Full-time place, per year – £51,000

Year abroad fee – £25,500 (applies to year in China)

The UK and international full-time fees shown are for the academic year 2026/27 (UK fees are subject to Parliamentary approval). UK year abroad and year in industry fees and international year in industry fees shown are for entry 2025, as 2026/27 fees have yet to be confirmed. Please be advised that tuition fees may increase each year for both UK and international students. For UK students, this will be subject to the government's regulated fee limits.

Tuition fees cover the cost of your teaching and assessment, operating facilities such as libraries, IT equipment, and access to academic and personal support. [Learn more about paying for your studies.](#)

Additional costs

We understand that budgeting for your time at university is important, and we want to make sure you understand any course-related costs that are not covered by your tuition fee. This includes costs for additional sets of scrubs, travel to placements, and occupational health clearance.

A lab coat will be provided free of charge in year one for use within the Human Anatomy Resource Centre.

Two pairs of scrubs will also be provided free of charge to each student. Replacement or additional sets will incur a cost of £25 plus delivery.

Dentistry students should expect the following additional costs in years three and five:

Year three: travel to placements

All students will undertake a placement in year three and are required to pay for their own travel costs. All placements are within a 35-mile radius of the campus and can be accessed by public transport. A return trip is estimated to cost between £5-15.

Year five: travel to placements and occupational health clearance

All students will undertake placements in year five in similar locations to year three. Students will be expected to pay for their travel to placements, but NHS bursary recipients will be reimbursed by NHS bursaries (non-means-tested/means-tested grants) for costs above the price of their regular commute to campus. If a student is not eligible for an NHS bursary they will not be able to claim additional travel costs.

Students will pay for occupational health clearance in year five. A standard assessment is approximately £30. If additional vaccinations or appointments are required, these will incur an additional cost.

Entry requirements

The qualifications and exam results you'll need to apply for this course.

Prior to applying for a place on the Bachelor of Dental Surgery BDS course, applicants should [read our admissions information](#).

UCAT

Please note that all applicants are required to sit the UK Clinical Aptitude Test (UCAT) in the year of application.

FAQs

Do you accept A level resit applications for dentistry?

No, examinations should be taken in one sitting after two years of study, unless significant corroborated extenuating circumstances are submitted.

Will it affect my application if I retake some of my A level modules but still complete my A levels in 2 years?

Module resits taken within the normal 2 year A level period e.g. an AS module retaken in the A2 year would be acceptable.

I do not have the GCSEs or A levels listed on the website will I still be considered for undergraduate study?

No, applications are only considered if all academic criteria is met.

Do you have a UCAT cut off score?

No we do not have a set UCAT score cut off point at Liverpool School of Dentistry. The UCAT scores will be considered along with the non-academic questionnaire and academic attainments.

If I accept an offer to another degree ie; biomedical, pharmacy can I transfer onto the Dental Course?

No we do not accept transfers onto the BDS.

I have not achieved good grades in my AS exams does this matter?

We do not consider AS levels when looking at applications.

Will it affect my application if I resit AS exams because my grades are not good?

If you do the resits while studying for your A levels then this will not affect your application.

A levels

AAA

including Chemistry and Biology, taken at first sitting, after two years of study. We do not accept level resits or consider applicants who have retaken either Year 12 or Year 13.

You may automatically qualify for reduced entry requirements through our contextual offer. Based on your personal circumstances, you may automatically qualify for up to a two-grade reduction in the entry requirements needed for this course. When you apply, we consider various factors – such as where you live – to assess if you're eligible for a grade reduction. You must make an application for a grade reduction – we'll do all the work.

Find out more about [how we make reduced grade offers](#).

If you don't meet the entry requirements, you may be able to complete a foundation year which would allow you to progress to this course.

Available foundation years:

- [Foundation to Dentistry \(Year 0\)](#) BDS

T levels

T levels are not currently accepted.

GCSE

Requirements in respect of GCSEs must be met. Applicants who have not taken GCSEs must have completed equivalent qualifications. For further information please read the admission information on the following web page:

<https://www.liverpool.ac.uk/dentistry/study/undergraduate/a200bachelorofdentalsurgery>

Subject requirements

A level Chemistry and Biology are required. The 3rd subject may be from the Arts or Sciences. General Studies, Critical Thinking and Vocational/Applied A levels are not accepted.

For applicants from England: Where a science has been taken at A level (Chemistry, Biochemistry, or Physics), a pass in the Science practical of each subject will be required.

BTEC Level 3 National Extended Diploma

Not accepted

International Baccalaureate

36 Points with 6 in Higher level Chemistry and Biology

Irish Leaving Certificate

H1, H1, H2, H2, H2, H2 including H1 in Chemistry and Biology

Scottish Higher/Advanced Higher

AAAAA at Higher level and AA at Advanced Higher level including Chemistry and Biology

Welsh Baccalaureate Advanced

Will be accepted in place of one A level, in addition to Biology and Chemistry A levels

Access

Applicants offering Access to Higher Education Diplomas should present from courses with significant Biology and Chemistry content at level 3. Candidates are expected to achieve distinction in 45 credits at level 3. For the full Access course requirements please read the information on the following web page:

<https://www.liverpool.ac.uk/dentistry/study/undergraduate/a200bachelorofdentalsurgery/>

Work Experience Requirements

Evidence required

Duty of Care

The University has an obligation to undertake health screening of all prospective dentists. Any offer of a place is conditional on completion of a health questionnaire and a satisfactory assessment of fitness to train from the University's Occupational Health Service. This includes obligatory immunisations and blood tests, in line with recommendations from the Department of Health.

of Health. All students also need to undergo an enhanced DBS check before admittance to the programme.

Mature Students

Studying for a degree later in life can be highly rewarding and our mature students are of our most successful. At Liverpool, we are committed to extending opportunities to all the desire and ability to succeed at university.

View our [Mature Students and Access courses pages](#) for more information.

International qualifications

[Select your country or region to view specific entry requirements.](#)

Many countries have a different education system to that of the UK, meaning your qualifications may not meet our direct entry requirements. Although there is no direct Foundation Certificate for this course, completing a Foundation Certificate, such as that offered by the [University International College](#), can guarantee you a place on a number of similar courses which interest you.

English language requirements

You'll need to demonstrate competence in the use of English language, unless you're from a [majority English speaking country](#).

We accept a variety of [international language tests](#) and [country-specific qualifications](#).

IELTS

IELTS 7.0 overall, with no component below 7.0

TOEFL iBT

100 overall, with minimum scores of listening 24, writing 24, reading 24 and speaking 26. TOEFL Home Edition not accepted.

Pearson PTE Academic

69 with no component below 69

Cambridge IGCSE First Language English 0500

Grade B overall, with a minimum of grade 2 in speaking and listening. Speaking and listening must be separately endorsed on the certificate.

Cambridge IGCSE First Language English 0990

Grade 6 overall, with Merit in speaking and listening

Cambridge IGCSE Second Language English 0510/0511

0510: Grade B overall, with a minimum of grade 2 in speaking. Speaking must be separately endorsed on the certificate. 0511: Grade B overall.

Cambridge IGCSE Second Language English 0993/0991

0993: Grade 6 overall, with a minimum of grade 2 in speaking. Speaking must be separately endorsed on the certificate. 0991: Grade 6 overall.

International Baccalaureate English A: Literature or Language & Literature

Grade 6 at Standard Level or grade 6 at Higher Level

International Baccalaureate English B

Grade 7 at Higher Level

Alternative entry requirements
