About this course

Immerse yourself in Ancient Egypt with one of the largest groupings of research active Egyptologists in the UK.

Introduction

You will gain an in-depth understanding of Ancient Egypt's archaeology, art, religion, history and society through the acquisition of key interpretive skills. This programme provides training in the Ancient Egyptian language from elementary to advanced level, giving you access to original hieroglyphic and Coptic writings and inscriptions. Our experts will bring their excavations and projects to the classroom, giving you privileged access to cutting-edge research.

You will be introduced both to the language (writing, grammar and texts) and the archaeology and history of Ancient Egypt, as well as to basic methods of archaeology. You will progress to study the language and texts of various periods, as well as Egyptian art, religion, history, and society. Final year students will have the opportunity to engage in independent Egyptological research.

What you'll learn

- The history of Ancient Egypt (from the Predynastic Period to Egypt under Roman rule)
- The various stages of the Egyptian language (hieroglyphs of the Old, Middle and New Kingdoms, and Coptic)
- The writings of Ancient Egypt (both documentary and literary)
- The archaeology of Ancient Egypt (its sites, monuments, and artefacts)
- The society and culture of Ancient Egypt (including daily life, technology, art, funerary beliefs and religion)

Combined degree

Choosing this subject as a combined degree

Egyptology, being the study of a specific human culture, shares approaches with many core subjects in the Faculty. As a result, studying 50% Egyptology would work particularly well with a large number of other programmes both ancient (eg archaeology, classics and ancient history) and more modern (eg english, sociology, history, languages or politics).

Teaching and assessment

How you'll learn

Modules are delivered by a mixture of lectures and seminars in year one, in year two the lecture element within modules is complemented by student led seminars. Finally, in year three, most modules are delivered by a short series of lectures with a focus on student-led seminars thereafter. Self-directed study is also expected through the course reading list and conducting research for your essays and projects. Academic staff are regularly available via their office hours for one-to-one feedback and support. Course material is available 24-hours a day on Canvas, our online learning platform, and study support is available from our dedicated student services team.

How you're assessed

Egyptology is assessed in a variety of ways.

Examination: learning outcomes are demonstrated in student performance through preparation for and the sitting of an examination. Such examinations may cover essay-based work (usually by selection of a set number of questions), source analysis (usually by selection of questions or a commentary on an ancient source) or language work (mostly translation and commentary of set passages).

Assessed coursework, including essays, commentaries, posters, and projects: learning outcomes are demonstrated in student performance through the preparation and delivery of a piece of work as an act of self-directed learning with full access to all the relevant learning and research tools and supports.

Portfolio: a critical summary of seminars presented by students reflecting on the material discussed in seminars and subsequently researched and presented as a discussion of the topic or theme.

Class tests, primarily in language modules: learning outcomes are demonstrated with regards to understanding, analysing and applying structures and concepts of grammar and syntax.

Oral presentations: modules assess presentation skills and several modules require the use of Microsoft PowerPoint.
