About this course

The University of Liverpool has a particular specialism in popular music, having established the world's first specialist centre for its study - the Institute of Popular Music - in 1988. Recent investment in our teaching facilities has provided state-of-the-art studios, practice rooms, a games research lab and a large rehearsal space.

Introduction

In addition to practical areas, this programme focuses on developing an in-depth and critical historical understanding of popular music repertoires, cultures, and practices. Practical modules are concerned with musical performance, song-writing, or creative music technology, although none of these are compulsory; while other modules focus on popular music history topics or the music industry. There are also options in areas such as music psychology and audio-visual media (films and videogames). Throughout, you will learn to write about popular music from a historical, critical, sociological, or philosophical viewpoint.

In your first year, core modules will take a detailed look at the nature of the popular music industries, and a critical exploration of 20th century popular music history – not only going through key musical milestones, but also exploring their social contexts and the long-term cultural implications.

In your second and final years you will focus in more depth on fewer selected topics, either concentrating solely on Popular Music modules, or retaining the option to pursue one or two modules in other areas. Specialist topics are studied alongside advanced level performance and music technology modules. In the final year, there is a particular emphasis on specialism and an extended or independent project (such as a research project, a music technology project, or an extended performance recital).

Year in Industry

Undergraduate students in the Department of Music have the opportunity to spend a year in industry, either in their third year, or by adding a 'follow-on year' at the end of their academic studies. These are paid placements within an organisation in industry, broadly defined, and you will receive support from the Department and the School of the Arts to source and apply for opportunities. Find out more about the difference between these options, including how to apply.
