About this course

The programme is designed for those interested in both the industrial and economic aspects of contemporary screen media (film, television and videogames) and in the complex ways in which such media interact with societies and cultures globally. Utilising cutting-edge research in the field, it prepares you for a career in the screen entertainment sector and/or a research degree.

Introduction

The programme provides you with the opportunity to develop an in-depth knowledge of the industrial and cultural dimensions that permeate screen-based media. It focuses on both the historical evolution of film, television and videogames and their shifting place in contemporary media industries and cultures, enabling you to understand the complexity of current media trends on a global scale.

Strongly interdisciplinary, the course brings together elements from a diverse range of disciplines, within the arts and humanities, including film studies, television studies, games studies, communication studies, media studies, policy studies, political economy, and others.

The programme cultivates fundamental transferrable skills related to media research, develops applied knowledge and provides real world insights all strongly informed by digital-led approaches and tools.

It also integrates practical experience as it benefits from the input of top screen industry practitioners who share their wealth of knowledge in specially organised events.

Who is this course for?

This course is for people who would like a career in the media industries, with a particular focus on screen media and entertainment. This could include areas such as media production, distribution, exhibition, sales, as well research development in film, television, videogame and streaming platforms.

Furthermore, the course can also be a stepping stone for a postgraduate research degree, especially in the field of media industry studies, which has been attracting a lot of scholarly attention in the last few years.

What you'll learn

- How media convergence is impacting the screen industries
- How media companies franchise intellectual property
- How streaming services are regulated
- How corporate and independent media intersect in a global market
- How screen cultures promote particular gender hierarchies
- How television is being redefined in light of the impact of streaming services

Teaching and assessment

How you'll learn

The programme consists of 1 x 30 credits and 1 x 15 credits core modules in Semester 1 and 1 x 30 credits module in Semester 2, plus 1 x 60 credits Dissertation module in the summer months.

The remaining 45 credits (15 in Semester 1 and 30 in Semester 2) will be supplemented by 3 x 15 credit optional modules available from the department of Communication and Media.

You will be advised which of these modules are particularly relevant to Screen Studies and its various learning outcomes but as Screen Studies, while more information will be detailed on the programme's CANVAS page.

Each module is taught on a weekly basis, either as part of 3-hour or 2-hour blocs and in the form of a workshop, where formal lectures and interactive engagement with students are combined to provide an active learning environment and to encourage knowledge sharing and peer learning.

Independent study is fostered by progressively more demanding essay-work and specified preparation for workshop or seminars, including a range of increasingly advanced bibliography to be explored and consulted.

For the 30 credit core modules independent study is expected to be approximately 16 hours a week over a 15-week combined semester and assessment period. For the 15 credit modules it is expected to be 8 hours a week.

In an ideal scenario, you will have approximately 7-8 hours a week in class as part of three modules that correspond to 60 credits, with the expectations that you will be able to dedicate approximately 30 hours to independent learning, consisting primarily of doing the key readings for each session, delving into secondary readings in your areas of interest, viewing important visual material (films, TV shows), researching and drafting assignments.

How you're assessed

The course's modules are assessed in a wide variety of methods that allow you to test their learning to specific 'real-world' contexts. Some of these assessments include:

- Project pitch – a live presentation of an industry focused project (Screen Industries)
- Wide Readership article – an article modelled on *The Conversation* journal (Screen Industries)
- TV viewing research journal – a theoretically informed understanding of TV practices (Redefining TV)
- Workshop run – taking charge of a class and develop focus group skills (Screen Industries)
- Research Methods comparison (compare and contrast two pieces of work designed through different methods (Researching Screen))

These methods are also supplemented with more traditional methods of assessment, including research-led essays, essay proposals and annotated bibliographies. Finally the core modules also include formative assessments in which the feedback is intended to help improve future work without a summative mark.

Liverpool Hallmarks

We have a distinctive approach to education, the Liverpool Curriculum Framework, which focuses on research-connected teaching, active learning, and authentic assessment to ensure our students graduate as digitally fluent and confident global citizens.

The Liverpool Curriculum framework sets out our distinctive approach to education. Our teaching staff support our students to develop academic knowledge, skills, and understanding alongside our **graduate attributes**:

- Digital fluency
- Confidence
- Global citizenship

Our curriculum is characterised by the three **Liverpool Hallmarks**:

- Research-connected teaching

Pre-sessional English

Do you need to complete a Pre-sessional English course to meet the English language requirements for this course?

The length of Pre-sessional English course you'll need to take depends on your current level of English language ability.

Pre-sessional English in detail

If you don't meet our English language requirements, we can use your most recent IELTS score, or [the equivalent score in selected other English language tests](#), to determine the length of Pre-sessional English course you require.

Use the table below to check the course length you're likely to require for your current English language ability and see whether the course is available on campus or online.

Your most recent IELTS score	Pre-sessional English course length	On campus or online
6.0 overall, with no component below 6.0	6 weeks	On campus
6.0 overall, with no component below 5.5	10 weeks	On campus and online options available
6.0 overall, with no more than one component below 5.5, and no component below 5.0	12 weeks	On campus and online options available
5.5 overall, with no more than one component below 5.5, and no component below 5.0	20 weeks	On campus
5.0 overall, with no more than one component below 5.0, and no component below 4.5	30 weeks	On campus

Your most recent IELTS score	Pre-sessional English course length	On campus or online
4.5 overall, with no more than one component below 4.5, and no component below 4.0	40 weeks	On campus

If you’ve completed an alternative English language test to IELTS, we may be able to use this to assess your English language ability and determine the Pre-sessional English course length you require.

Please see our guide to [Pre-sessional English entry requirements](#) for IELTS 6.5 overall, with no component below 6.0, for further details.
