About this course

This MA provides research training with a specific focus on developing the skills needed to examine and analyse how societies, cultures, institutions and practices came into being, how they are organised today and how they continue to change.

Introduction

You'll be part of a department at the forefront of research that supports social justice. We aim to give you a stimulating and supportive environment where you can explore what it means to be social, where society might be heading and how we can shape our shared futures.

World-leading experts from across the social sciences teach our programmes, and a specialist in your chosen area will supervise your independent research project. You'll gain advanced research and communication skills, along with the ability to think analytically. These are vital for a successful career across many sectors and also provide an excellent foundation for further postgraduate study.

You'll study the politics and practice of social research, looking at the role of the social scientist and the opportunities and challenges of different approaches. We'll also introduce you to the debates that have shaped the relationship between method and knowledge, and how these continue to influence the social sciences today.

This master's has Economic and Social Research Council 1+3 recognition status and is designed for those intending to pursue professional or academic research in sociology, social policy or criminology. It will equip you to examine how societies,

cultures and institutions came into being, how they are organised now and how they continue to change.

Who is this course for?

This master's is suitable for graduates in the Social Sciences or related areas. It is an excellent step for those who want to progress to postgraduate study at MPhil and PhD level, or pursue a career as an independent social researcher.

What you'll learn

- How to plan and execute sociological research
- A critical understanding of epistemological, methodological and ethical approaches in social research
- Training in general research skills
- Key debates, issues and controversies in sociological scholarship
- How social, public and civil policy can be influenced by sociological knowledge
- Project management and problem-solving skills

Course content

Discover what you'll learn, what you'll study, and how you'll be taught and assessed.

Semester one

The MA programme consists of 120 credits of taught modules and a final project worth 60 credits.

In Semester 1, you are required to take two compulsory 20 credit modules and 20 credits of optional modules chosen from within the Department of Sociology, Social Policy and Criminology, Faculty of Humanities and Social Sciences and North West Social Science Doctoral Training Centre.

If you are considering progressing to a PhD (Sociology and Social Policy) or applying for any ESRC PhD funding route, you should equip yourself with a good standard of literacy in social research methods across a range of data collection, analysis and management techniques. We strongly recommend that all postgraduate students undertake modules in both qualitative and quantitative methods, including **SOCI503 Understanding Society Using Quantitative Methods** (semester 1) at the very least, or equivalent training made available elsewhere in the university or across the engage@liverpool initiative. For those applying for ESRC PhD funding, this requirement should preferably be fulfilled during your MA or MRes programme, or – if successfully awarded ESRC PhD funding – during the first year of your PhD at the latest.

Modules

Programme details and modules listed are illustrative only and subject to change.

Final project

You must take either the Dissertation module or the Extended Interchange Project module, both worth 60 credits each. This final project is normally submitted in the September ending the year of the MA programme.

Modules

Compulsory modules	Credits
<u>DISSERTATION (SOCI403)</u>	60
<u>EXTENDED INTERCHANGE PROJECT (SOCI530)</u>	60

Programme details and modules listed are illustrative only and subject to change.

Teaching and assessment

How you'll learn

You'll be taught through a mixture of large group seminars/tutorials, small group workshops, one to one tutorials and research supervision meetings. You'll also carry out project work and private study.

Teaching is delivered in an interactive, participatory and inclusive way, with extensive support of small group teaching and online learning platforms.

How you're assessed

Each of the taught modules are formally assessed by coursework on a semester basis. Depending on the learning objective of the module, this may include essays, project work, fieldwork analysis, research strategy document, report of research observation, book review or the completion and analysis of interviews.

Liverpool Hallmarks

We have a distinctive approach to education, the Liverpool Curriculum Framework, which focuses on research-connected teaching, active learning, and authentic assessment to ensure our students graduate as digitally fluent and confident global citizens.

The Liverpool Curriculum framework sets out our distinctive approach to education. Our teaching staff support our students to develop academic knowledge, skills, and understanding alongside our **graduate attributes**:

Careers and employability

The Social Research Methods MA is designed to meet pre-employment training and post-career development needs. It will equip you with the skills required to progress directly onto doctoral level social research or to take up employment in a wide variety of careers across the government, charitable and private sectors.

This MA is recognised nationally by the [Economic and Social Research Council](#) for providing quality methods training for those seeking a career in social science. National and local government, as well as Regional Development Agencies, have highlighted the growing demand for graduates with expertise in the full spectrum of research design and analysis techniques.

Potential career pathways include, but are not limited to, roles within:

- Commercial research
- Public health sector
- Public policy
- Third/NGO sector

This MA also equips you with the skills and knowledge needed for an academic career or a university research career in the Social Sciences (Sociology, Social Policy and Criminology) or in a related discipline.
