About this course

Our approach to sociology engages you in a critical study of society. You will learn to make sense of what drives change in the social world and the possible directions this change may take.

Introduction

The effect of new ideas, technologies, government programmes and social conflict on everyday life is explored through your study of a broad range of subjects that take in local, national and global social relationships. The aim is to give you a comprehensive grasp of the sociological imagination and the real world issues it speaks to.

The core modules in year one provide you with a firm foundation for future study. How can sociology help us address social change and divisions? Where best can our sociological imagination apply itself? In year two, you will increase your understanding of social theory and research methods and broaden your knowledge of society through a range of options. By year three you will have the choice to study specialist subjects in-depth and develop your independent learning.

You may opt for a dissertation and pursue a topic of your choice. Alternatively, you can gain valuable employability skills and opt for our social policy project and combine work experience with your studies, by carrying out a piece of research commissioned by a local agency.

Our programmes are based on cutting edge research and are ideal preparation for careers or further study where clear, creative thinking is valued. From the historical foundations of crime and punishment to the implications of digitisation in social, political, economic and cultural life.

Course content

Discover what you'll learn, what you'll study, and how you'll be taught and assessed.

Year one

In year one, students are introduced to the classic works of Marx, Weber and Durkheim before exploring a range of 20th century social theorists, thus laying a strong foundation for future study. On the practical side, there are two linked modules (social change and social policy in contemporary society I and II), which look at issues such as the family, social class, gender and 'race'. A further introductory module, studying society, looks at the use of social science research methods and ensures that by the second year all students are fully acquainted with all the skills they need to progress in their studies.

*Some modules may not be available depending on your selected programme of study.

Combined degree

Choosing this subject as a combined degree

Studying Sociology as 50% of your degree gives you a thorough understanding of the way in which society works. Core modules in year one provide you with a firm foundation for future study.

Sociological theory embraces the classic work of Marx, Weber and Durkheim and a range of 20th century social theorists. A further 30 credits are available within Sociology and you may choose from the following modules. Social change and social policy investigates contemporary controversies around issues such as the family, social class, gender and 'race'. Studying society looks at the basics of social scientific work, including research methods, and an introduction to IT – ensuring you are fully conversant with utilising online resources. Both introduction to crime and society, and controlling crime explore key concepts in the criminology and criminal justice process.

Year two compulsory modules include thinking sociologically: approaches to social inquiry, and social research methods.

In year three, you will have the choice to study specialist subjects in-depth and develop your independent learning. You may opt for a dissertation and pursue a topic of your choice.

Alternatively, you can gain valuable employability skills and opt for our Applied social research module or Social policy project and combine work experience with your studies, by carrying out a piece of research commissioned by a local agency.

Teaching and assessment

How you'll learn

You will be taught through a combination of face-to-face teaching in group lectures and small class sessions, tutorials and seminars, which are supplemented by opportunities to get one-to-one guidance from academic staff during their weekly 'open office' hours. The rest of your study time will be spent undertaking directed independent study, making use of our excellent library and IT facilities.

You will also be supported throughout by an individual academic adviser. Learning is delivered in a variety of formats including lectures, seminars, workshops, tutorials, guided independent study, group work and reflective and experiential learning.

The primary purpose of lectures is to provide you with a broad introduction to key areas and debates on a given topic pitched at the appropriate level of study. The lectures aim to facilitate your reading and highlight issues to be explored during independent study time in preparation for seminars and assessment.

Seminars provide opportunities to explore particular issues and debates in greater detail in a way that supplements and builds upon the lectures. Seminars also allow for greater levels of student participation and such participation will be actively encouraged throughout the programme. Workshops frequently follow the format of seminars but they also may be used to develop particular skills in a teaching context. For example, workshops develop skills in data analysis and skills in interviewing.

Guided independent study may also feature in your learning experience. Group work is a feature of all seminar teaching and group work takes place both with and outside of formal scheduled classes.

How you're assessed

Assessment takes many forms, each appropriate to the learning outcomes of the particular module studied. Most modules are assessed by means of a mixture of essays and examinations. Typically, a module in yeartwo might involve a 4,000 word essay or a 2,500 word essay plus a one hour examination. Some modules are assessed wholly or in part by other appropriate means, such as the preparation of projects and individual or group presentations. The final degree class is based on year two and three marks, weighted in favour of year three marks.

Liverpool Hallmarks

We have a distinctive approach to education, the Liverpool Curriculum Framework, which focuses on research-connected teaching, active learning, and authentic assessment to ensure our students graduate as digitally fluent and confident global citizens.

The Liverpool Curriculum framework sets out our distinctive approach to education. Our teaching staff support our students to develop academic knowledge, skills, and understanding alongside our **graduate attributes**:

- Digital fluency
- Confidence
- Global citizenship

Our curriculum is characterised by the three **Liverpool Hallmarks**:

Careers and employability

We will enable you to develop a range of social scientific, analytic and communication skills and a variety of transferable skills valued by many employers in a range of industries (eg media organisations, local government and charitable organisations, and commercial and financial service sectors).

Our graduates have gone onto successful careers in:

- public and private sectors
- social welfare and criminal justice agencies (the police and probation services)
- non-governmental organisations (NGOs).

Studying with us also provides a sound basis from which you will be able to pursue postgraduate studies either with a vocational orientation (MA in Social Work, Legal Practice Course, for example) or to further your research skills at masters and doctoral levels.

Recent employers

- Merseyside Police
- HM Prison Service
- National Probation Service
- Legal Services Commission
- Mencap
- IPSOS Mori
- Shell
- British Council

Work experience opportunities

We encourage all our students to participate in <u>SLSJ Extra</u>, a series of talks and workshops featuring members from the legal, criminal and voluntary sectors, as well as other leading professionals and reform advocates from the UK and beyond. SLSJ Extra demonstrates how the academic disciplines of law, sociology, social policy and criminology can open doors to a range of fulfilling professions. This foundation of extracurricular activity supports students in their future career aspirations.

We also help our students to take advantage of **work experience** opportunities. In your second year, you have the option to integrate work experience into your studies.

By the third year, you can take advantage of work placements through our Interchange service, which connects you with various voluntary and charitable organisations within the region. You can also gain valuable volunteering experience with support from Employability & Interchange Coordinators or by participating in the **Peer Mentoring Scheme**.

Placements are available for Sociology, Social Policy and Criminology students, involving research projects that impact communities on both local and national levels. These opportunities are expanding each year, with this year's research placements including collaborations with the National Youth Advocacy Service and The Heseltine Institute.
