

This course is now closed to UK applicants. If you're an international student, you can still apply. Courses may close earlier than the advertised application deadline due to demand. [Browse more courses for 2026 entry](#)

BVSc

Veterinary Science

UCAS code D100

Entry requirements

A level: AAA

Study mode

Full-time

Duration

5 years

Apply by: **15 October 2025**

Starts on: **28 September 2026**

About this course

Our course is designed to create practical, compassionate and resilient veterinary surgeons and to equip our graduates with the skills and qualities required to practice in the 21st century.

Introduction

The Bachelor of Veterinary Science (BVSc) programme offers world-leading scientific and clinical training in veterinary medicine. The BVSc is internationally accredited and on graduation, you will be qualified to practise as a veterinary surgeon in the UK (RCVS), Ireland and Europe (EAEVE), Australia and New Zealand (AVBC), South Africa (SAVC), North America (AVMA) and many other countries around the world.

Our students get to enjoy a vibrant university experience for the first three years of the course, based at the central Liverpool campus. Years 4 and 5 are based at our Leahurst site, on the stunning Wirral, with North Wales on your doorstep.

Liverpool vet school offers in-depth clinical and research-based training and a hugely motivated, dedicated teaching staff. The university provides all of its own teaching across all five years of the course, using our two farms (covering beef and dairy cattle, pigs and sheep), our own teaching horses and our own teaching clinics. Across these sites our students have access to over 10,000 small animal cases a year, and over 5,000 equine and large animal cases.

Programme in detail

Our integrated spiral curriculum offers an innovative approach to teaching and learning, where subjects are revisited year on year with an increasing focus on clinical application as the course progresses.

Your study will commence with animal handling, the science of normal structure and function, the welfare and husbandry of animals and the incidence and distribution of disease.

You will continue to build on this knowledge in second year, adding pathology and parasitology, further practical techniques and learning about veterinary research in our research skills course. In third year, you will study pathology and parasitology in more detail start the clinical science course and complete a research project, allowing you to study an area of interest in much more detail.

You will begin learning and using clinical skills from day one, taking advantage of our dedicated facilities to practise the essential techniques required in every field of veterinary practice such as bandaging, injection technique, lab analysis, suturing and knot tying.

Our professional skills thread also starts in year one. You will learn how to communicate effectively with others, in both written and spoken form, and you will get to put this into practice with professional actors who act as your clients in simulated veterinary consultations. You will also learn about the importance of practice finance and how veterinary businesses operate.

In fourth year, you will move to Leahurst. You will complete a lecture based clinical theory course by the February of fourth year and then complete 31 weeks of clinical rotations spread fairly equally between production animal, equine and small animals with a dedicated rotation in exotics medicine. Over 90% of rotations take place at the Leahurst Campus, with students additionally gaining front line experience in commercial practices during their 20 weeks of extra-mural studies (EMS).

Following your clinical rotations, you will have the chance to choose a 3-week elective subject to study in greater depth. You also have the opportunity to take a year out from the veterinary

science programme to study in China or for an additional, intercalated degree. A wide variety of subjects are available, both at Liverpool and other universities in the UK and abroad.

International opportunities

During clinical rotations, you will have the opportunity to join up to a 3-month exchange programme with one of our partner vet schools in Europe and the USA:

- Belgium – Ghent University
- Finland – University of Helsinki
- France – National Veterinary School of Alfort
- Norway – Norwegian School of Veterinary Science
- Switzerland – University of Bern, Vetsuisse Faculty
- USA – Kansas State University.

What you'll learn

- A core foundation in basic and clinical science which will support development of clinical reasoning and practical skills
- Animal handling and essential techniques required in every field of veterinary practice such as physical examination, injection technique and lab analysis.
- An understanding of the role of animals in human health
- The role of vets in the treatment and prevention of disease in individual animals and populations
- Development of professional skills to enable engagement with all aspects of veterinary science and clinical practice.
- The knowledge, expertise and attitudes required for a 21st century career in clinical or academic veterinary practice, business or scientific research.

Course content

Discover what you'll learn, what you'll study, and how you'll be taught and assessed.

Year one

- Animal husbandry and welfare
- Infectious diseases
- Normal structure and function
- Professional, clinical and study skills
- Public health and epidemiology

Programme details and modules listed are illustrative only and subject to change. As part of our commitment to continuous improvement, we are currently reviewing all of our programmes. This may include refining study pathways, strengthening links with employers, integrating generative AI, developing students' research skills, and enhancing alignment with our research strengths. The course content currently shown on this page reflects the programme as it is running in September 2026. This page will be updated for students beginning in September 2027 by 1 September 2026 at the latest.

Year two

- Animal husbandry
- Infectious diseases
- Normal structure and function
- Professional, clinical and research skills
- Public health and epidemiology

Programme details and modules listed are illustrative only and subject to change. As part of our commitment to continuous improvement, we are currently reviewing all of our programmes. This may include refining study pathways, strengthening links with employers, integrating generative AI, developing students' research skills, and enhancing alignment with our research strengths. The course content currently shown on this page

reflects the programme as it is running in September 2026. This page will be updated for students beginning in September 2027 by 1 September 2026 at the latest.

Year three

- Management of disease, pathology and parasitology, Professional (including business), clinical and research skills, public health and epidemiology.

Programme details and modules listed are illustrative only and subject to change. As part of our commitment to continuous improvement, we are currently reviewing all of our programmes. This may include refining study pathways, strengthening links with employers, integrating generative AI, developing students' research skills, and enhancing alignment with our research strengths. The course content currently shown on this page reflects the programme as it is running in September 2026. This page will be updated for students beginning in September 2027 by 1 September 2026 at the latest.

Year four

- Clinical rotations
- Management of disease

Programme details and modules listed are illustrative only and subject to change. As part of our commitment to continuous improvement, we are currently reviewing all of our programmes. This may include refining study pathways, strengthening links with employers, integrating generative AI, developing students' research skills, and enhancing alignment with our research strengths. The course content currently shown on this page reflects the programme as it is running in September 2026. This page will be updated for students beginning in September 2027 by 1 September 2026 at the latest.

Year five

- Clinical rotation
- Electives

Programme details and modules listed are illustrative only and subject to change. As part of our commitment to continuous improvement, we are currently reviewing all of our programmes. This may include refining study pathways, strengthening links with employers, integrating generative AI, developing students' research skills, and enhancing alignment with our research strengths. The course content currently shown on this page reflects the programme as it is running in September 2026. This page will be updated for students beginning in September 2027 by 1 September 2026 at the latest.

Teaching and assessment

How you'll learn

There is a combination of problem-based learning, didactic teaching and small-group practical classes allowing students to develop lifelong learning techniques.

Liverpool Learning Framework

At Liverpool, we take a distinctive approach to education through the Liverpool Learning Framework. This means teaching that is engaging, inclusive and designed to help you succeed during your studies and beyond.

You'll develop specialist subject knowledge alongside the skills employers value most, including:

- Digital fluency
- Confidence
- Global citizenship

Our curriculum is characterised by the three Liverpool Hallmarks:

- Research-connected teaching – learning informed by the latest ideas and discoveries
- Active learning – taking part, applying knowledge and learning by doing
- Authentic assessment – assessments designed around real-world tasks and challenges

We also embed key priorities across our curriculum, including AI literacy, employability, and sustainability, helping you prepare for the future and make a positive impact in the world.

We're committed to creating a supportive and inclusive learning environment where every student can thrive.

Careers and employability

Studying this degree will prepare you for a wide range of careers in animal sciences and the vast majority of veterinary students find employment within six months of graduation.

Most newly qualified vets choose to work in private veterinary practices but many graduates find work in:

- Laboratories
- Animal charities
- The public health sector
- Research
- Higher degrees like PhDs, or further studies in particular veterinary specialities.

You can explore the following postgraduate opportunities here at Liverpool:

- Veterinary Science MSc
- Veterinary Science PhD/MPhil/DVSc
- Bovine Reproduction DBR
- RCVS/Certificate in Advance Veterinary Practice.

Fees and funding

Your tuition fees, funding your studies, and other costs to consider.

Tuition fees

UK fees (applies to Channel Islands, Isle of Man and Republic of Ireland)

Full-time place, per year - £9,790

Year in industry fee - £1,955

Year abroad fee - £1,465 (applies to year in China)

International fees

Full-time place, per year - £44,850

Year in industry fee - £1,955

Year abroad fee - £22,425 (applies to year in China)

The fees shown are for the academic year 2026/27. Please be advised that tuition fees may increase each year for both UK and international students. For UK students, this will be subject to the government's regulated fee limits.

Tuition fees cover the cost of your teaching and assessment, operating facilities such as libraries, IT equipment, and access to academic and personal support. [Learn more about paying for your studies.](#)

Additional costs

We understand that budgeting for your time at university is important, and we want to make sure you understand any course-related costs that are not covered by your tuition fee. This could include buying a laptop, books, or stationery.

Find out more about the [additional study costs](#) that may apply to this course.

Entry requirements

The qualifications and exam results you'll need to apply for this course.

Information for prospective applicants

Please refer to the [Veterinary Science Prospective Applicants page](#) for important guidance notes and detailed information for BVSc (D100) applicants.

Applicants to Veterinary Science should be aware that students will be required as part of the registration process at the start of their studies to undergo an occupational health assessment.

Please note that admission to our [foundation year](#) is limited to mature students who have typically been out of formal education for some time, or who have taken non-traditional qualifications.

A levels

AAA

including Biology (or Human Biology) and Chemistry. If Chemistry is not taken at A level, it must be taken at AS level (at grade B or above) and the second A level must be another academic science-related subject.

You may automatically qualify for reduced entry requirements through our contextual offers scheme. Based on your personal circumstances, you may automatically qualify for up to a two-grade reduction in the entry requirements needed for this course. When you apply, we consider a range of factors – such as where you live – to assess if you're eligible for a grade reduction. You don't have to make an application for a grade reduction – we'll do all the work.

Find out more about [how we make reduced grade offers](#).

If you don't meet the entry requirements, you may be able to complete a foundation year which would allow you to progress to this course.

Available foundation years:

- [Foundation to Veterinary Science \(Year 0\) BVSc](#)

T levels

T levels are not currently accepted.

GCSE

At least five GCSEs at grade 7 (A) including two science GCSEs (either as separate subjects or e.g. dual award science). With at least a grade 6 (B) in English (literature or language) and Mathematics.

Subject requirements

For applicants studying A levels with English exam boards: Where a science has been taken at A level (Chemistry, Biology, Geology or Physics), a pass in the Science practical of each subject will be required.

BTEC Level 3 National Extended Diploma

We no longer accept BTEC qualifications.

International Baccalaureate

36 points overall to include, Grade 6 at Higher Level Biology, Grade 6 at Higher Level Chemistry, Grade 6 at Higher Level in any other subject.

Irish Leaving Certificate

The recognised A level equivalent qualification is the Irish Higher Leaving Certificate. H1, H1, H2, H2, H2, H2 (new grading system) OR A1, A1, A1, A1 (old grading system). Biology: (H1); Chemistry: (H1); English: (O3 at Ordinary Level or H6 at Higher Level); Maths: (O3 at Ordinary Level/Standard Level or H6 at Higher Level).

Scottish Higher/Advanced Higher

Not accepted without Advanced Highers. Grade B in Biology at Advanced Higher, Grade B in Chemistry at Advance Higher, Grade AA in Biology and Chemistry and Grades AAB in 3 other subjects at Higher Level.

Welsh Baccalaureate Advanced

Accepted in place of a third A level

Access

Kitemarked level 3 Access to Medicine at pre-approved colleges is required with a minimum of 15 credits in Biology and a minimum of 15 credits in Chemistry. Approval MUST be obtained prior to application. Please contact the Admissions Office for further information.

Work Experience Requirements

Candidates should have work experience in both animal husbandry and clinical (veterinary practice) setting. For more information, please see the [Veterinary Science Prospective Applicants page](#).

International qualifications

[Select your country or region to view specific entry requirements.](#)

Many countries have a different education system to that of the UK, meaning your qualifications may not meet our entry requirements.

Alternative entry requirements

- If your qualification isn't listed here, or you're taking a combination of qualifications, [contact us](#) for advice
 - [Applications from mature students](#) are welcome.
-

English language requirements

You'll need to demonstrate competence in the use of English language, unless you're from a [majority English speaking country](#).

We accept a variety of [international language tests](#) and [country-specific qualifications](#).

IELTS

7.0 overall, with no component below 7.0

TOEFL iBT

If you took a TOEFL test on or before 20 January 2026, you'll need 100 overall, with minimum scores of listening 24, writing 24, reading 24 and speaking 26. If you took a TOEFL test from 21 January 2026 onwards, when a new scoring system was introduced, you'll need 5 overall, with 5 or above in all components. TOEFL Home Edition not accepted.

Pearson PTE Academic

69 overall, with no component below 69

Cambridge IGCSE First Language English 0500

Grade B overall, with a minimum of grade 2 in speaking and listening. Speaking and listening must be separately endorsed on the certificate.

Cambridge IGCSE First Language English 0990

Grade 6 overall, with Merit in speaking and listening

Cambridge IGCSE Second Language English 0510/0511

0510: Grade B overall, with a minimum of grade 2 in speaking. Speaking must be separately endorsed on the certificate. 0511: Grade B overall.

Cambridge IGCSE Second Language English 0993/0991

0993: Grade 6 overall, with a minimum of grade 2 in speaking. Speaking must be separately endorsed on the certificate. 0991: Grade 6 overall.

International Baccalaureate English A: Literature or Language & Literature

Grade 6 at Standard Level or grade 6 at Higher Level

International Baccalaureate English B

Grade 7 at Higher Level
