Support for NSS areas

The Academy & The Centre for Innovation in Education
From the Academy and CIE, October 2022

This document was created by the Academy and CIE to provide a comprehensive overview of the support available to colleagues across the University as we collectively address the outcomes of the NSS.

The following sections are mapped to each of the NSS areas and support is categorized as resources, workshops, programmes and networks. While a wide range of key activities are included, the list is not exhaustive and colleagues are encouraged to contact the academy@liverpool.ac.uk and cie@liverpool.ac.uk to discuss any specific requirements.

The NSS results highlighted areas of real strength across the University. We encourage you to share your excellent practice with colleagues to further enhance teaching development and student learning. We can help you disseminate and gain recognition for your exemplary practices through our jointly run conferences, the Academy’s Developing Academic Practice Journal and Developing Practice Podcast Series, the CIE Treasure Island Podcast Series and CIE Case Studies.

Colleagues are encouraged to gain professional recognition for their experience of teaching and supporting learning through, for instance, the Academy’s ULTRA Scheme. Internal recognition through the Academy’s Learning and Teaching Fellowships and the Learning and Teaching Student Experience Awards and Sir Alistair Pilkington Awards provides a key mechanism through which your innovation and practice can be celebrated and further supported. To gain external recognition for your teaching, contact the Academy to explore opportunities provided by National Teaching Fellowships (NTF) and Collaborative Awards for Teaching Excellence (CATE) and find out more about how we collaborate with partners across the sector to celebrate high-performing academics.

Of course, the NSS results highlight some areas that require renewed focus and further development. Our programmes will help you develop your academic practice, gain teaching qualifications and/or professional recognition, and build capacity for evidence-based scholarship of learning and teaching. Our networks and peer learning help you to connect with peers and support each other’s development in a collegiate environment. Resources and workshops can provide timely support and fresh thinking as you review your activities. In contrast, deeper engagement and collaborative learning can transform academic practice. For instance, the Leading Learning and Teaching at Liverpool Network, facilitated by the Academy and HSS, is a 6-month action learning programme designed to address specific education projects to improve performance and outcomes. Alternatively, the MA Academic Practice provides supervised support for your own project, supporting you to enhance your teaching and student learning.
