

Liverpool Marine Science Symposium Series

Thursday 22nd January, 2009

Posters (to be presented during lunch in the Foresight Centre)

| | |
|------------------------------|--|
| Gualtiero Badin | Are mesoscale eddies in shelf seas due to baroclinic instability? |
| Christopher Cesar | The impact of commercial cockle (<i>Cerastoderma edule</i>) harvesting on ecosystem function |
| Clare Davis | Phosphorus dynamics in the Celtic Sea |
| Jo Hopkins | Monitoring ocean fronts from space |
| Chris Hughes | The spectrum of sea level variability |
| Diane Jones | Altering topography: effects on biodiversity and ecosystem functioning |
| Kostas Kiriakoulakis | The interactions between a shallow cold-water coral reef (Tisler Reef Skagerrak) and its close environment |
| Cheryl Knowland | Modelling the effect of cyclones on coral reef dynamics |
| Ming Li | Impacts of a tidal barrage on sediment transport in estuary: A case study on Mersey Estuary |
| Nikki Lloyd | A comparison of viral infection and predation as a control for harmful algal blooms |
| Miguel Angel Morales Maqueda | Geothermal heat flux and its influence on the oceanic abyssal circulation and radio carbon distribution |
| Katherine Nisbet | Exploring connectivity in the marine benthos |
| Vassil Roussenov | Boundary wave communication of bottom pressure and overturning changes for the North Atlantic |
| Elena Stoica | Seasonal dynamics of bacterioplankton community structure in the eastern Irish Sea |
| Jo Williams | Atlantic circulation in a 1000 year climate model |
| Nicholas Yates | Tidal Power from the Estuaries of NW England |
