

Our practice is now taking part in the **Equine Veterinary Surveillance Network (EVSNET)**

EVSNET collects deidentified data from electronic health records. The team aims to respond to a wide variety of challenges in equine health and welfare and to contribute to evidence-based medicine in equine veterinary practice.

For more information including what to do if you do not wish to take part, visit the EVSNET website [www.liverpool.ac.uk/evsnet](http://www.liverpool.ac.uk/evsnet)
