Your Development
Our aim is to allow you to gradually hone your skills to meet the NMC Standards of Proficiency for Registered Nurses (NMC, 2018).

Flexible Learning
A flexible approach to teaching allows our students to learn and develop in both academic and practical environments.

People Power
We have over 100 staff who work tirelessly to develop our students into the best healthcare professionals in the country.

Career Prospects
There are plenty of job opportunities at home and abroad with high UK vacancy rates and an estimated shortage of six million mental health nurses globally.

Course Details
The objective of this programme is to equip you with the necessary knowledge, skills and attributes to meet the challenges of being a mental health nurse in the changing context of healthcare, and to succeed in either the modern National Health Service or Private, Voluntary and Independent Sectors.

This is an accelerated two-year programme that delivers lifelong learning and working opportunities as well as a strong focus on nursing leadership. You will gain valuable theoretical knowledge and vital practical experience. The groups are small which ensures that you receive the appropriate personal guidance and attention to allow you to maximise your learning potential.
