Programme Overview

The MSc Radiotherapy programme is a part time course studied over one year and is aimed at students who have already successfully completed the PG Diploma in Radiotherapy. The aim of the course is to allow students to progress to the next level of expertise in the Radiotherapy profession. Students will be encouraged to undertake an in-depth investigation in the field and studies will be supported by a mixture of group workshops and individual tutorials. Students will be able to complete the year by demonstrating their higher level thinking skills through the presentation of a dissertation. This course is accredited by the Society and College of Radiographers (SCoR)
Module and Course Information

The programme consists of one 60 credit module: HEAL 451 or HEAL 461 (depending on start date)

The Dissertation module is a multidisciplinary module that is delivered twice per year. Students undertaking this module to obtain the MSc Radiotherapy will be allocated dissertation supervisors from the Directorate of Radiotherapy.

Entry Requirements

Applicants must have successfully completed a pre-registration PGDip in Radiotherapy and must be able to complete the MSc within 6 years of commencing their PGDip in Radiotherapy. With the approval of the University AQSC, students applying for this programme are exempt from the APEL/APL regulations
