**NURSING**

The Directorate of Occupational Therapy and School of Medicine have received a Faculty Learning and Teaching Award for a collaborative educational project in which final year occupational therapy students facilitate learning relating to ‘Accessing Healthcare’ with first year medical students. This project is innovative because, in addition to providing a valuable inter-professional learning opportunity, both groups of students are working to achieve a different set of learning objectives. The project has now been put forward for consideration for a University based award.

**Staff News:**

- **Bethan Collins (Occupational Therapy)** has been successful in securing a research grant of £68,597 to undertake work with a colleague in UCLan (who used to work in the University of Liverpool). The research is funded by the Macular Society and is entitled, ‘Identifying best practice in the delivery of peer support groups: learning from the lived experience of Macular Society support groups.’

- **Helen Potter (Nursing)** has been awarded her Masters in Education from the University of Chester; her dissertation topic was ‘First year student nurses experience of caring for older people with dementia and their perceptions and preparedness for practice’

**Helen Orton (School)** has been appointed as Secretary for the Association of Advanced Practice Educators

- **Helen Orton (School)** is running a Dementia Awareness and Dementia Friends Session during the University’s Wellbeing Week in May.
Orthoptics: Orthoptics students were successful in a recent competition which was run by the International Orthoptic Association and open to members from around the world. This year’s theme was – Orthoptic Science Meets Art, and we won first (popart image), second (art chart) and third place (kaleidoscope eye). See winning photographs below which were a collaborative effort between Alan Bannister (Faculty Photographer) and the staff and students in Orthoptics. Congratulations to all involved!

Second Place:
Third Place:
