- Learn about realist methodology;
- Explore if realist methodology is a right fit for your inquiry;
- Work on your research design, programme theories and CMO configurations;
- Partake in one-on-one sessions with facilitators and receive specialized feedback;
- Present your work-in-progress;
- Gain exposure to a diversity of projects and share knowledge;
- Use quiet space for data immersion and writing;
- Network and collaborate;
- Enhance your productivity and advance your research

Facilitators:

Dr Justin Jagosh directs the Centre for Advancement in Realist Evaluation and Synthesis at the University of Liverpool. He is a co-investigator on the RAMESES II project to develop quality guidelines and reporting standards for Realist Evaluation. He has provided guidance on over 50 realist projects since 2013.

Dr Sonia Dalkin is a Lecturer in Public Health and Wellbeing at Northumbria University. She has significant experience in realist approaches, providing training in the approach throughout the UK and internationally. Her work portfolio reflects her realist experience with projects in palliative care, health inequalities and Patient Reported Outcome Measures (PROMs).

Dr David Blane is a CSO Clinical Academic Fellow in General Practice, University of Glasgow. He is an academic general practitioner in Glasgow, in his final year of a PhD using realist methodology and has expertise and teaching experience in the field of health inequalities and global health.
