

LA³NET

Topical workshop series open to all

The LA³NET topical workshops involve training and discussion on the state-of-the-art in key technological areas in the application of lasers for the next generation of accelerators.

Renowned international speakers will be invited and delegates will have the opportunity to contribute with their own work.

There will be discussion sessions to plan for future research requirements and develop collaborations.

Contact and further details:

For further details on the LA³NET project and events available to attend please see the project web site:
