

Making an Impact 2022

9 May – 10 June

The **Making an Impact Series** is tailored to provide researchers and research-related staff access to development activities focused around research impact and knowledge exchange.

The **Making an Impact Framework** brings together key aspects of Research England's 'Knowledge Exchange Framework' (KEF) (A-H on image) and Innovate UK's 'Action Plan for Business Innovation' (Theme's 1-5 on image).

By mapping all sessions to the Making an Impact Framework, researchers can clearly see how each session can provide insight into a particular knowledge exchange area(s) (such as IP and commercialisation) as well as how it will provide information and understanding that can be applied to the principles and values that have a positive impact on business success (Growth at scale – commercial capabilities).

How do I use the Making an Impact Framework to navigate the Making an Impact programme?

All sessions are mapped to the Making an Impact Framework with a key on the programme highlighting which knowledge exchange area and innovation theme will be covered in each session. For example, if you would like to know more about working with businesses globally using the framework, you would look for sessions that are mapped to B and colour green.
