

Shark conservation internship, South Africa

Neve Cooper, *Environmental Sciences*

a) what the activity involved

Scientific internship in South Africa working as an assistant biologist on a shark cage diving boat. I also had practical lessons on photography, tagging and tracking sharks and baited underwater remote videos.

(b) Host organisation

Marine Dynamics INFO@MARINEDYNAMICS.ORG

(c) How the trip helped with personal academic and career development

The trip increased my independence as I had to travel to Cape Town alone. This also had to be well organised and I had to make sure my choices were financially viable. Working and talking to people from different cultures improved my cultural awareness and also communication skills
