

School of Medicine Admission Requirements

Further Notes for Applicants for all programmes (A100/A101)

Please note:

Admission Tests: All non-graduate applicants applying to the A100 programme will be required to sit UKCAT. Please see www.ukcat.ac.uk Graduates applying to either of both the A100 and A101 programmes will be required to sit GAMSAT Details at <http://gamsat.acer.edu.au/gamsat-uk> Details of how we use the tests are outlined in our Departmental Supplement to the Admissions Policy. www.liverpool.ac.uk/medicine/study-with-us/undergraduate/admissions-information/

- All applicants to the University Of Liverpool School Of Medicine who hold a degree at the time of application are usually expected to have graduated with at least a good 2:1. Applications from those holding a 2:2 degree (or lower) are not considered.
- Applicants with A2 level in Biology and Chemistry will not usually be considered under the guidelines for applicants with non-traditional qualifications.
- Although we accept applications to our Medicine programmes from students entering the final year of study in their degree programmes, we do not usually accept applications from current undergraduates or consider transfers into the Medicine programmes.
- Applicants currently studying for a Master's degree must have completed their programme by the end of August of the year in which they enter the School (by end of July for A101) Applicants currently undertaking a PhD must have submitted their thesis by the 1st January of the year that they wish to enter the University of Liverpool School of Medicine. If invited to interview applicants will be expected to provide the appropriate proof in relation to expected completion of their programme or submission of their thesis.
- English Language, Mathematics, Chemistry, Biology and Physics are considered core subjects. Applicants should make sure that their UCAS form is completed as fully as possible with details given of subjects studied and grades obtained throughout their secondary education. Full details of study/qualifications in our core subjects should be given. Failure to do so will potentially lead to the rejection of the application on the basis of insufficient information.

Please note:

- Applicants **must** read our Departmental Supplement to the Admissions Policy. Applications made through UCAS in the normal way. However for the 2018-19 admissions cycle an **additional on-line form** will need to be completed by certain groups of applicants. Please check our web-pages and Departmental Supplement to the Admissions Policy. www.liverpool.ac.uk/medicine/study-with-us/undergraduate/admissions-information/
- The above indicative criteria are the usual **minimum** required. Invitation to interview is highly competitive and both academic and non-academic criteria inform the selection process. Because of the competition, meeting minimum academic and non-academic requirements does not guarantee that you will receive an offer of an interview. No candidate will be made an offer without interview. The medical school reserves the right to vary offer conditions depending on a candidate's application.
- The selection process at Liverpool is a three stage process which is competitive at each stage. The threshold for progressing through each stage varies from year to year depending upon the quality and quantity of applications that year.
