Abu S. Abdullah, et al.	' <i>Second-hand smoke exposure and household smoking bans in Chinese families: a qualitative study</i> ' (2012)	To explore the issues around second-hand smoke (SHS) exposure among children and other non-smokers in households.	4 focus groups and 10 in-depth interviews conducted with 31 households in the Shanghai, China.	Open access not available
Joan L. Bottorff, et al.	' <i>A family affair: Aboriginal women's efforts to limit second-hand smoke exposure at home</i> ' (2010)	To explore the factors influencing smoking in home environments and Aboriginal women's efforts to minimize exposure for their children and themselves.	Individual interviews and focus groups conducted as part of a community-based ethnographic research study involving 26 women, in the northwest region of British Columbia.	Open access not available
Lauren Coxhead, and Tim Rhodes.	' <i>Accounting for risk and responsibility associated with smoking among mothers of children with respiratory illness</i> ' (2006)	A study of mothers who smoke and whose young child was recently admitted to hospital with respiratory illness. An exploration of mothers' constructions of risk and responsibility associated with their smoking.	Loosely-structured qualitative interviews conducted with 9 mothers in the West London area of England.	https://onlinelibrary.wiley.com/doi/full/10.1111/j.1467-9566.2006.00484.x
Cam Escoffery, Michelle C. Kegler, and Susan Butler	' <i>Formative research on creating smoke-free homes in rural communities</i> ' (2009)	To explore factors that would convince families to adopt household smoking bans and actions to create and maintain smoke-free homes.	In-person interviews of 102 households in Southwest Georgia.	https://academic.oup.com/her/article/24/1/76/593714
Gillian S. Gould, et al.	' <i>"Nobody smokes in the house if there's a new baby in it":</i>	To explore the attitudes and experiences related to prenatal	5 focus groups conducted with 18 community members in	https://www.womenandbirth.org/article/S1871-5192(13)00109-

	<i>Aboriginal perspectives on tobacco smoking in pregnancy and in the household in regional NSW Australia'</i> (2013)	tobacco smoking by Aboriginal women and household smoking.	regional New South Wales.	1/fulltext
Rosemary J. Herbert, Anita J. Gagnon, Janet E. Rennick, and Jennifer L. O'Loughlin	<i>"Do it for the kids": Barriers and facilitators to smoke-free homes and vehicles'</i> (2011)	To explore the barriers and facilitators to making homes and vehicles smoke-free among parents with a child 5 years of age or younger.	Data collected in the context of a randomized controlled trial that tested an intervention to empower parents to make their homes and vehicles smoke-free. Interviews conducted with 36 participants.	https://search.proquest.com/docview/851873547?pq-origsite=gscholar
Lola Hill, Karen Farquharson and Ron Borland	<i>'Blowing smoke: strategies smokers use to protect non-smokers from environmental smoke in the home'</i> (2003)	To investigate strategies smokers use to protect non-smokers from exposure to tobacco smoke in their homes, and the perceived effectiveness of, and obstacles to implementing, these strategies.	Face-to-face, semi-structured interviews with 20 Australian apartment-dwelling smokers.	Open access not available
Clare Holdsworth and Jude E. Robinson	<i>"I've never ever let anyone hold the kids while they've got ciggies": moral tales of maternal smoking practices'</i> (2008)	To explore how mothers who smoke construct moralities of their smoking behaviour, particularly in relation to where and with whom they smoke.	In-depth Biographic Narrative Interpretative Method interviews with 12 smoking mothers and their partners (n=5).	https://onlinelibrary.wiley.com/doi/full/10.1111/j.1467-9566.2008.01102.x
Tanya Jochelson, Myna Hua and Chris Rissel	<i>'Knowledge, attitudes and behaviours of caregivers regarding children's exposure to environmental tobacco smoke among Arabic and Vietnamese-speaking communities in</i>	To inform the design of a culturally appropriate health communication campaign addressing exposure of young children to second-hand smoke in homes, targeted at caregivers of	9 focus groups; 5 conducted with Arabic speakers (n=32) and 4 conducted with Vietnamese speakers (n= 29)	Open access not available

	<i>Sydney, Australia</i> ' (2003)	children aged 0-6 years in the Arabic- and Vietnamese-speaking communities in Sydney, Australia.		
Laura L. Jones, <i>et al.</i>	<i>'The motivators and barriers to a smoke-free home among disadvantaged caregivers: Identifying the positive levers for change'</i> (2011)	To explore home smoking behaviours and the motivators and barriers to smoke-free homes among a group of disadvantaged caregivers for young children, and to identify the positive levers that health care professionals can utilize when supporting smoking behaviour change.	In-depth qualitative interviews with 22 disadvantaged smoking caregivers accessing Children's Centre Services in Nottingham, UK.	Open access not available
Michelle C. Kegler, Cam Escoffery, Allison Groff, Susan Butler and Alisa Foreman	<i>'A qualitative study of how families decide to adopt household smoking restrictions'</i> (2007)	To explore the process families go through in adopting voluntary household smoking restrictions.	158 qualitative interviews conducted in 102 households of rural African American and White adults in South West Georgia, USA.	Open access not available
Aimei Mao	<i>'Space and power: Young mothers' management of smoking in extended families in China'</i> (2013)	To explore how young mothers in extended families in mainland China managed the smoking of their husbands and other family members.	An ethnographic study of 29 participants (from 22 families) in the rural area of Central Jiangsu.	Open access not available
Richard Phillips, Amanda Amos, Deborah	<i>'Smoking in the home after the smoke-free legislation in Scotland: qualitative study'</i> (2007)	To explore the accounts of smokers and non-smokers (who live with smokers) of smoking in their homes and cars after the Scottish smoke-free legislation; to	Semi-structured interviews of 50 adults conducted across Scotland	https://www.bmj.com/content/335/7619/553.full

Ritchie, Sarah Cunningham- Burley and Claudia Martin		examine the reported impact of the legislation on smoking in the home; and to consider the implications for future initiatives aimed at reducing children's exposure to secondhand smoke in the home.		
Blake Poland, Denise Gastaldo, Anna Pancham and Roberta Ferrence	<i>'The interpersonal management of environmental tobacco smoke in the home – a qualitative study'</i> (2009)	To investigate the nature, genesis and micro-social context of self-imposed restrictions on smoking in the home.	Interviews in 15 diverse households in Toronto, Canada with resident children.	Open access not available
Deborah Ritchie, Amanda Amos, Richard Phillips, Sarah Cunningham- Burley and Claudia Martin	<i>'Action to achieve smoke-free homes: an exploration of experts' views'</i> (2009)	Identification of key issues and challenges that need to be considered when developing action to promote smoke-free homes at the national and local level.	Part of a wider study, this paper focuses on the final phase of the study, involving two panels of experts (n=13) with experience of tobacco control and community development, who were convened to discuss the findings of the primary study.	https://bmcpublichealth.biomedcentral.com/articles/10.1186/1471-2458-9-112
L. Roberts, <i>et al.</i>	<i>'Parents perceptions of the pros and cons of banning smoking at home'</i> (2000)	To explore the factors perceived by parents as mediating the creation and maintenance of smoking bans at home.	4 focus group discussions conducted with 33 smoker parents of children aged under 10 years in Adelaide, South Australia.	Open access not available

Jude E. Robinson	<i>"Trying my hardest": The hidden social costs of protecting children from environmental tobacco smoke'</i> (2008)	To explore the wider social lives of mothers who smoke, and the possible influence that constraints within their everyday social world may have on their smoking behaviours and their children's exposure to tobacco smoke.	Focus group discussions with 54 women who were smokers or had quit in the previous 6 months, who had at least one child under 5 years of age living with them.	Open access not available
Jude E. Robinson and Andrew J. Kirkcaldy	<i>'Disadvantaged mothers, young children and smoking in the home: Mothers' use of space within their homes'</i> (2007)	To explore how mothers living in disadvantaged areas use space within their homes to smoke while looking after children aged 0-4 years, and to critically examine how they define non-smoking or smoking homes.	7 focus groups conducted with 54 women.	Open access not available
Jude E. Robinson and Andrew J. Kirkcaldy	<i>"Imagine all the smoke in their lungs": Parents' perceptions of young children's tolerance of tobacco smoke'</i> (2009)	To explore the factors influencing parent's behaviour in preventing the exposure of their (unborn) children to environmental tobacco smoke (ETS) and any changes to their smoking behaviour in the home during the first years of their children's lives.	10 focus groups organised across Merseyside, UK, involving 54 women and 16 men, who were smokers or had quit in the previous 6 months, who had at least one child under 5 years of age living with them.	https://academic.oup.com/her/article/24/1/11/591686
Jude E. Robinson, Deborah Ritche, Amanda Amos,	<i>'Volunteered, negotiated, enforced: family politics and the regulation of home smoking'</i> (2011)	To explore how people living in Scotland have introduced various home smoking restrictions to reduce or eliminate children's exposure to tobacco smoke, and how some have gone on to	Phase 1: semi-structured interviews of 50 smokers and non-smokers (living with smokers) Phase 2: Semi-structured interviews of 9 participants	https://onlinelibrary.wiley.com/doi/full/10.1111/j.1467-9566.2010.01273.x

Lorraine Greaves, and Sarah Cunningham-Burley		influence people in their wider familial and social networks.	who were family members of the Phase 1 respondents.	
Inga S. Wilson, et al.	<i>"I'm not doing this for me": Mothers' accounts of creating smoke-free homes' (2013)</i>	To explore mothers' narratives of changing home smoking behaviours after participating in an intervention (REFRESH) aimed at reducing families' exposure to secondhand smoke in homes in Scotland.	Semi-structured interviews with 21 participants.	https://academic.oup.com/her/article/28/1/165/594724
Yvonne Yousey	<i>'Family attitudes about tobacco smoke exposure of young children at home' (2007)</i>	To explore families' attitudes about smoking and their perceptions of the effects of environmental tobacco smoke (ETS) on their children.	Face-to-face semi-structured interviews in 20 households containing a child under 5 years of age.	Open access not available
