

Verification of Prior Learning

All applicants must complete this form and return it with a copy of their degree transcript via email to dental.enquiries@liverpool.ac.uk before the UCAS deadline of 15th October 2018. In order to meet the entry requirements for the graduate entry pathway programme, the contents of each learning outcome listed in the first column must have been studied within your first degree. Please enter in the second column the title of the degree module in which each learning outcome was or is to be studied. Any form returned after 15th October 2018 will not be considered.

Learning Outcomes	Title of module in prior degree in which the learning outcome has been studied
Body Cells and Structure	
Describe the structure and function of proteins, lipids and carbohydrates	
Outline the role of DNA and RNA in protein synthesis	
Outline the difference between meiosis and mitosis	
Explain the role of genes	
Explain why multi-cellular organisms discriminate between self and non-self	
Body Systems and Nutrition	
Outline the anatomical organization of the cardiovascular, respiratory, digestive and excretory systems	
Describe the physiological function of the cardiovascular, respiratory, digestive and excretory systems	
Describe the nutritional requirements of the body	
Body Locomotion and Control	
Describe the structure of musculoskeletal system	
Describe the types of joints and associated movement	
Describe the function of connective tissues	
Describe the control of systems of the body
