SHAPING SUSTAINABLE FUTURES PROGRAMME

Join our three-day thought-provoking programme and discover how your organisation can benefit from future thinking to create sustainable opportunities

Centre for Sustainable Business

Programme outline

'Shaping Sustainable Futures' is an innovative programme aimed at enhancing your strategic approach to sustainability and will help you reimagine how organisations can shape a better future.

The programme is designed around a series of interactive explorations of alternative futures to enhance your organisation's strategic foresight.

DAYS 1 AND 2 – IN PERSON

Over two consecutive days we experiment with 'futures thinking' tools and approaches to collectively reimagine how organisations can shape sustainable outcomes.

Our experts will provide evidence and insights, from which we will create, explore and debate a series of plausible future scenarios.

DAY 3 – HYBRID

We reconvene for Day 3 of the programme to share everyone's progress, experience, and plans for shaping a preferable future.

This provides the opportunity and space to share, reflect, and learn from your peers, by exploring key questions about your sustainability journey.

Professor Jo Meehan

Director of the Centre for Sustainable Business

"By joining the 'Shaping Sustainable Futures' programme, you will become part of a peer network community who share a strategic mindset that strives for a more sustainable future for business and society"
