2030 SDGs Game Workshop

Wednesday 16th March
1pm - 4pm
Sustainable Development Goals

Launched in 2015, the United Nations’ Sustainable Development Goals (SDGs) are a series of ambitious targets to end extreme poverty, fight inequality and injustice and fix climate change for everyone by 2030. If the Goals are met, they ensure the health, safety and future of the planet for everyone on it. The SDGs are universally relevant and we are all have a role to play in contributing to a more sustainable world.

The best chance of the SDGs being met is if everyone on the planet is aware of them.

“Tell me, and I will forget. Show me, and I may remember. Involve me, and I will understand.”

Participants playing the 2030 SDGs Game learn through play and experience a change in perspective, they feel more connected to the challenges we all face and are more ready to take action.

Come and participate in the 2030 SDGs Game workshop in order to:

- Understand relevance of sustainable development
- Demystify the SDGs
- Experience first hand what it takes to create a balanced world and how everything is are interconnected
- Explore the power of your actions and how you can contribute to a more balanced world.

Wednesday 16th March, 1pm - 4pm. Email: valeria.andreoni@liverpool.ac.uk to register your interest

2030 SDGs Game Workshop

A thought-provoking multi-player facilitated card game simulates what the world could look like in 2030. The 2030 SDGs Game highlights the importance of balancing the three pillars of People, Planet and Prosperity and brings sustainability to life.

Participants in the simulation receive time, money and projects, and decide how to invest their resources and which projects to run in order to work towards achieving their goals. What will be the impact on the world of the projects they play? Will they create a prosperous, fair and sustainable world?
Who can play the game

Anyone can! Whether you have no prior knowledge of the SDGs or you are an SDG expert you can play this game. The game has been played by people all over the world from senior management of leading global companies, government official, to university students, activists and everyone in between. The more diverse the game participants are, the more representative of society it is.

What do previous participants have to say about the experience

"Our mindset has to change if we want to have a sustainable planet for the future generations. The 2030 SDGs Game is an easy way to get into the Sustainable Development Goals and understand the impact our own behaviour has on reaching the goals." – Agile Coach and Trainer, Spain

"Playing the SDGs game I realized how much the SDGs are interconnected and can only be achieved in a collective effort. While we all pursue our personal goals, we sometimes have to take a break and look again at the big picture." – UN Programme Officer, Switzerland
“We talk about the SDGs, but what can we actually do about them and how do we do it? Like many of today’s big issues, it all seems so big, complicated and impossible to do alone that it’s hard to get started. The SDGs Game is a great way of experiencing what it’s like just to get started on your bit of the puzzle and simultaneously work together to make a difference across the whole puzzle. It’s exciting, collaborative and eye opening. I highly recommend it!” – Charity Programme Lead, UK

“The 2030 SDGs Game encourages patience, resilience and partnership to look beyond immediate horizons and profit motives, towards business practices that best utilize scarce resources and partnerships for shared value”. Health professional, Australia

“It is amazing to see that you can inspire a transformation in thinking in three short hours through game-based learning. The SDG Games are really for everyone – students, businesses, big and small organisations – I can’t praise the experience with Co-CREATE ImpACT’s expert guidance enough.” University Lecturer, Switzerland

Who runs the 2030 SDGs Game

The workshop is facilitated by accredited 2030 SDGs Game facilitator, Alice Richard. Alice is a sustainability catalyst and former UN employee who has built her career around products and collaborations that drive positive change. Today through her innovative company Co-CREATE ImpACT, Alice leads inspiring sustainability training and designs game-based approaches to bring sustainability and meaningful content to life.

The 2030 SDGs Game is a thought-provoking game-based workshop that is a great way to get teams engaging with the Sustainable Development Goals. At its core is a facilitated interactive card game that simulates what the world could look like in 2030. The game engages participants in exploring how we can achieve a more balanced world and the consequences of our actions.

**WHY PLAY THE GAME?**

**Ownership**

I have a role to play. Ownership is one of the key barriers for companies wanting to embed sustainability across their business. The 2030 SDGs Game contributes to changing the mindset that sustainability is the responsibility of someone else.

**Collaboration**

We can change the world when we work together. To succeed in the 2030 SDGs Game, participants need to see the bigger picture, think collectively and work together. This makes the workshop a great tool for team-building sessions.

**Responsibility**

My actions are important. Playing the game and reflecting on it afterwards, participants realise how important all of our actions are and that even seemingly small actions can have a big impact. With the right culture and recognition of their contributions, this realisation can inspire employees to get involved and take action for sustainability.

**WORKSHOP PROGRAMME**

STANDARD LENGTH: 3 HOURS

- Welcome and warm up
- Introduction to the SDGs
- Rules of the 2030 SDGs Game
- Facilitated game play
- Reflection and learnings
- Taking action for the SDGs in a connected world

**WORKSHOP LENGTH AND CONTENT CAN BE ADAPTED AND TAILORED TO CLIENT REQUIREMENTS**
