

Hints and tips: Chemical Management

Chemical management can cost up to £1 for every £1 spent on the chemical.

1. Procurement

- a. Check if the chemical is already available in the lab for use before purchasing.

2. Preparing Chemicals

- a. Follow the 12 principles of green chemistry.

3. Labelling

- a. A good labelling system will help with identifying chemicals and prevent waste.

4. Management

- a. Make sure your lab has a chemical inventory system.

	Chemical:
	Concentration:
	Date made:
	Made by:

5. COSHH

- a. Make sure COSHH forms are available for all chemicals.

6. Disposal

- a. Know how to dispose of waste chemicals.
- b. Hazardous chemicals for disposal should be stored and collected via Avanti.
