

Annual Subject Action Planning 2024/25

Taught Provision

(for provision in 2023/24)

Appendix Four: Data for reporting and action planning

The data sources for reporting are summarised below:

i) Tableau dashboards

The Tableau dashboards include access to numbers on intake, continuation and classification, with the ability to view the data specific to different student cohorts. The expected supply to Faculty is October, with finalised dates to be communicated by your Faculty, at which point full guidance on access and use will also be shared. These dashboards are prepared by the Business Intelligence Team within Strategic Planning.

ii) Other data sources

Business Objects ASR Explorer Spaces: The 2023/24 intake numbers and tariff data for that intake are available in Explorer (accessible through the ASR Admissions space).

iii) Graduate outcomes data

This is available from the Careers and Employability Service:

<https://www.liverpool.ac.uk/intranet/careers/graduateoutcomes/>

iv) Access and Participation Plan targets data

This is being provided by Student Recruitment, WP and Admissions to each Faculty's APVC for Education and Head of Education and Student Experience, who are responsible for sending it to relevant staff in the Schools, Institutes and Departments. If you have any queries about completing the APP question, please contact the operational lead for the plan: john.corish@liverpool.ac.uk
