

# Programme of Talks

## Indoor – Lecture Theatre

Time	Topic / talk title	Speaker
11:00	What happens at Leahurst?	Prof Dan Batchelor
11:30	To Barnyards and Beyond: Liverpool Farm Veterinarians in Uncharted Space!	Dr Joe Neary
12:00	SATH Speaker	Prof Tim Bentley
12:30	Applying to study Veterinary Science at the University of Liverpool **	Prof Karen Noble
13:00	What happens at Leahurst?	Prof Dan Batchelor
13:30	A Whistlestop Tour of our Equine Hospital and Practice	Prof Debbie Archer
14:00	When dolphins come ashore..... how we can help and what we can learn *	Dr Gail Leeming
14:30	Applying to study Veterinary Science at the University of Liverpool **	Prof Karen Noble

\* (PG Rated - there will be a couple of gory pictures and references to death)

\*\* This is aimed for those aged 15+, i.e. studying in year 10 or above

Time	Title and description	Speaker image	Speaker name and bio
11:00	<p><b><i>What happens at Leahurst?</i></b></p> <p>Ever wondered what happens on our campus at Leahurst? Come along to this talk to hear all about what we do here including our work in teaching and training vets and how we treat and take care of sick animals.</p>		<p><b><i>Prof Dan Batchelor</i></b></p> <p>Dan is a Professor in Internal Medicine in the Small Animal Hospital.</p>
11:30	<p><b><i>To Barnyards and Beyond: Liverpool Farm Veterinarians in Uncharted Space!</i></b></p> <p>Just over the road from our Leahurst campus are our two farms where we have dairy cows, sheep, pigs and cattle. Hear from Joe about the work of our farm vets.</p>		<p><b><i>Dr Joe Neary</i></b></p> <p>Joe is a Senior Lecturer in Livestock Health and Welfare</p>
12:00	<p><b><i>Brain surgery in dogs: Why, who, when, how? And does it hurt?</i></b></p> <p>We will discuss brain surgery in dogs, especially brain tumour removal and placing shunts to drain excess spinal fluid. Brain tumours can cause dogs a lot of problems, but with the latest surgical techniques we can remove brain tumours and return dogs to having an enjoyable, long quality of life.</p>		<p><b><i>Prof Tim Bentley</i></b></p> <p>Tim is a Professor of Small Animal Neurology in the Small Animal Hospital.</p>
12:30	<p><b><i>Applying to study Veterinary Science at the University of Liverpool</i></b></p> <p>Are you a prospective student interested in a career as a vet? Come along to this talk aimed at those aged 15+ to hear about the admissions process and applying to vet school.</p>		<p><b><i>Prof Karen Noble</i></b></p> <p>Karen is a Professor in Anatomy and Physiology and also our Director of Admissions.</p>

			<b>** Aimed for those aged 15+</b>
<b>13:00</b>	<p><b><i>What happens at Leahurst?</i></b></p> <p>Ever wondered what happens on our campus at Leahurst? <b>13:30</b>	<p><b><i>A Whistlestop Tour of our Equine Hospital and Practice</i></b></p> <p>What do we do in our Equine Hospital and Practice? Come along to find out about the work we do with horses at our busy equine sites.</p>		<p><b><i>Prof Debbie Archer</i></b></p> <p>Debbie is a Professor of Equine Surgery in the Philip Leverhulme Equine Hospital</p>
<b>14:00</b>	<p><b><i>When dolphins come ashore..... how we can help and what we can learn</i></b></p> <p>Cetaceans (dolphins, porpoises and whales) sometimes get stuck, or “strand” on land. This can happen for many reasons, some of which we don’t understand very well. Organisations like the BDMLR train volunteers to assess and if appropriate to re-float stranded cetaceans, but sometimes the animals are too sick or injured, and they die, or are put to sleep. We can learn from these animals too and this talk will tell you some of the ways that veterinary pathologists investigate these cases.</p>		<p><b><i>Dr Gail Leeming</i></b></p> <p>Gail is a Senior Lecturer in Veterinary Pathology.</p> <p><b>* Please note, this talk will include some images of tissues, parasites and dead animals</b></p>
