

Aim	To move a team member to a position specified by a series of steps specified as distances and compass directions.
Materials	1 metre rule
Method	<ul style="list-style-type: none">• Each team stands at a point on the edge of a large circle.• Following the list of directions given on a separate sheet, a team member moves as directed.• The directions are given for a polar grid of longitude and latitude – the North Pole is at the centre of the circle.• When the directions have been followed, a marshal will determine the accuracy of the team member's movement.
Conditions	<ul style="list-style-type: none">• No calculators.• The metre rule(s) may not be moved.
Time limit	25 minutes.
Ranking	The ranking order will be determined by the distance between the final position of the team member and the position at which he/she should be.
