

# ***Liverpool Human Collider***

<b><i>Aim</i></b>	To collide two pairs of team members at a specified point
<b><i>Materials</i></b>	None
<b><i>Method</i></b>	Two pairs of team members walk towards each other from opposite ends of a linear collider (which looks remarkably like a corridor). The pairs attempt to walk at the same speed and hence collide in the centre of the detector.
<b><i>Conditions</i></b>	<ul style="list-style-type: none"><li>• Each team member will be blindfolded during travel</li><li>• No verbal communication between pairs during travel</li></ul>
<b><i>Time Limit</i></b>	15 mins for all to practice + 10 mins to judge the 6 teams
<b><i>Ranking</i></b>	The ranking order will be determined by the distance from the collision point to the centre of the detector.
