

Micro CD

Aim To estimate the thickness of a compact disk

Materials 5 compact disks 1 laser and screen

Method Any method may be used

Conditions

- No measuring rulers other than the CDs themselves may be used (note: the diameter of a CD is 120 mm)
- The thickness at the outer edge of the CD is to be estimated
- The laser must not be removed from the retort stand
- The estimate must be given in units of microns

Time limit 25 minutes

Ranking The ranking order will be determined by the difference between the estimated value and the actual value
