OSCC Prognosis

UNIVERSITY OF LIVERPOOL

Cancer Head and Neck

Question Can a survival endpoint that characterises prognosis for OSCC (oral squamous cell carcinoma) patients be based on outcome data alone?

Benefits Establishing a time point (of 11 months) separates high-risk patients from those at low risk with a clear distinction in outcome

Funding CRUK grant C7738/A26196 (2018–2022)
EPSRC PhD studentship

	Total	*< 11*	*> 11*	*Validation*
