

Wildlife Photography

Introduction

Not really a talk...

... more an excuse to show some of my favourite wildlife photos

Along the way there will be...

... a few hints and tips

... some dos and don'ts

... some technicalities (shutter speeds, apertures, ISO settings)

The intention is to allow you to get more out of your own attempts at capturing wildlife, whether it be in Africa or your back garden.

Wildlife Photography / Introduction

2

Contents

- **Composition** — *Framing the subject*
- **Focus** — *Keeping the subject sharp*
- **Lighting** — *Using natural light to best effect*
- **Shutter speed** — *Keeping the subject sharp (again)*
• **Lens aperture**
- **Context** — *Don't forget the background*
- **Serendipity** — *Making the most of good luck*
